## ***EXECUTIVE SUMMARY***

### ***Introduction***

The Nigeria Erosion and Watershed Management Project (NEWMAP), initiated by the Federal Government of Nigeria (FGN) and funded by the World Bank (WB) and International Development Fund (IDF), is being implemented in Delta State, Nigeria and other participating states to help reduce soil erosion vulnerability in the States and to develop the States' watersheds. Jesse is one of the towns in Delta State acutely being degraded by flood and erosion during the wet season, and perennially suffers huge losses resulting from these impacts. The town is inundated with heavy annual rainfalls resulting in severe flooding of the catchment area and serious threats to lives and properties. Through the NEWMAP opportunity, Delta State NEWMAP is targeting to remedy the perennial flooding in Jesse and to rehabilitate eroded areas of the community.

The objective of the WB Resettlement Plan is to restore persons affected by the project to a condition equivalent to or better than the pre-project situation. The Jesse flood and erosion control project will address and prevent the perennial flood that occur in the area as well as reverse land degradation within Jesse community. This Resettlement Action Plan (RAP) specifically identifies and assesses the human impacts that may be associated with the planned flood intervention as designed and all other activities aimed at rehabilitating the flood plain. The monitoring and institutional actions to be taken before the remedial construction/rehabilitation works have also been provided.

### ***Project Description***

The Jesse flood and erosion project consists of remedial structural and non-structural developments that include civil and bioremediation works within the flood plain. The proposed ground interventions will address, prevent and reverse land degradation for the long-term and will involve rehabilitation and reconstruction of the existing drainage systems along defined corridors. The rehabilitation and reconstruction activities will involve civil works as well as bioremediation activities requiring the acquisition of land within populated areas. This will therefore cause involuntary resettlement thereby triggering the World Bank's OP 4.12 - the World Bank Resettlement Policy.

### ***Need for RAP***

The Resettlement Policy Framework (RPF) for NEWMAP indicates that the number of potential project affected persons (PAPs) in the NEWMAP sub-projects would be less than 200. According to World Bank safeguard policy OP4.12, this would normally require the preparation of an Abbreviated Resettlement Action Plan (ARAP) as the social safeguard for the sub-project. However, because the Jesse flood affects the heavily populated areas of the town with critical infrastructures and residential homes, the social impacts are significant and the number of affected persons is also greater than 200. Consequently, a Resettlement Action Plan (RAP) is required in accordance with WB Safeguard policy to guide the intervention process for the project. This RAP has been prepared to conform to the requirements of the WB OP4.12 and the Nigerian national social policies, guidelines and assessment procedures as well as those of Delta State and the Local Agencies.

### ***Project Location***

Delta State is located in the South South geopolitical zone of Nigeria. Jesse town is located within the co-ordinates: latitude 6° 7'N and 6° 15'N and longitude 6°50'E and 6° 867'E and situated in Ethiope West LGA in the southern part of the Delta State. The project area affected by this RAP is 30,006 square meters.

### ***Legal Framework for Land Acquisition***

The Nigeria Land Use Act of 1978, amended under the Amended Land Use Act of 2004, Chapter L5 provides the legal framework for land acquisition in Nigeria. Under the World Bank, the Operational Policy OP 4.12 addresses land acquisition and involuntary resettlement. The differences between the Land Use Act and the Bank's OP 4.12 are mostly in the rehabilitation measures, which are neither proscribed nor mandated in the Act. It is noted that in the event of divergence between the two policies, the one that better serves the needs of the PAPs takes precedence.

### ***Potential Impacts***

There are both positive and negative impacts associated with this project. On the positive side, this project will provide a huge emotional and economic relief to residents of Jesse whose residential and commercial properties, ancestral lands and livelihoods are under continued flood and erosion degrading effects. Additionally, the project will improve traffic flow and transportation in and out of the project area upon completion. It will also reduce costs of transportation and delays on travelling along the access road and improve livelihoods for the area residents due to reduced cost of transportation. Furthermore, it will improve the landscape vista and provide temporary job opportunities for both skilled and un-skilled labors.

The identified major negative social impacts of the project include loss of arable land and economic trees/farm crops as well as loss of access to individual private properties. Mitigation of these impacts to acceptable levels has been proffered. About 30,006 m<sup>2</sup> of land is needed to be acquired for the rehabilitation of existing roads and construction of flood control channels. There are 154 persons whose lands have been identified that may be so impacted. The project does not envisage any permanent involuntary relocation of persons resulting from destruction of existing buildings or structures. A total of 510 project-affected persons (PAPs) and 33 persons who are considered vulnerable on account of their age, fragility, disability, etc. have been identified. Also identified are 286 persons whose structures may be partly affected by project activities. Many of the structures involved are temporary trading structures which must be removed during the project construction phase. The persons whose residences are too close to the project impact areas may be temporarily relocated to allow for safe completion of works. All the land owners whose lands shall be permanently acquired for flood and erosion control should be appropriately compensated for the land and improvements on their land as well as any loss of economic trees/crops in accordance with the WB and Nigeria Policies on land acquisition.

### ***Mitigation of Potential Impacts***

It is important that prior to project implementation, resettlement and livelihood restoration for the PAPs should be effected. Owners of acquired land and any economic trees/crops there-on should be compensated. Residents/tenants of building structures who are identified as PAPs and vulnerable persons due to age, fragility, disability, etc. who may likely be adversely impacted by project activities should be temporarily relocated during the construction phase and be compensated for the inconveniences of relocation.

### ***Public Participation and Consultations***

Public participation and stakeholders' consultations were conducted in the course of this RAP to ensure that the rights and interests of PAPs are considered seriously. Local level consultative forums serve as community voices and these have become part of the entire project process. This RAP documents those that were consulted, dates, concerns raised and the Consultant response to these concerns. Household census and socioeconomic survey of the people identified as PAPs were conducted to establish their socioeconomic profile including health related status. Only PAPs

who registered and met the cut-off date (February 13, 2018) during the baseline survey are considered to be eligible for any form of compensation or assistance.

### ***Grievance Redress Mechanism***

A mechanism through which complaints and disagreements can be smoothly resolved has been developed by the SPMU and the WB. Currently, there is a series of customary avenues that exist to deal with dispute resolution in the community and they will be employed as the “court of first appeal”, as necessary. There is also the WB-approved grievance redress committee process which has been put in place. It is anticipated that this will provide unencumbered platform for people to express their dissatisfaction over any matter as well as avoid unnecessary legal delays and cost overrun of the project. All grievances or complaints must be registered and compiled regularly for project management. The devised mechanisms are fundamental to achieving transparency in the resettlement/relocation and compensation process.

### **RAP Coordination and Implementation**

The State has appointed a Focal NGO (FNGO) who is expected to serve as part of the RAP implementation process. The FNGO will provide technical support to the SPMU and ensure monitoring & evaluation of the implementation process. The primary responsibility for the RAP implementation is on the SPMU. The SPMU, may therefore appoint consultants/agents to provide necessary awareness, mobilization and facilitation, project appraisal, approval & disbursement, capacity building, monitoring & evaluation reporting to the FPMU and the World Bank.

The budget estimate for compensation for the permanent acquisition of land, loss of economic trees/crops, loss of commercial structures and temporary relocations under this RAP, including cost of administration, monitoring and evaluation is **N56,593,110.00** (Fifty Six Million, Five Hundred and Ninety Three Thousand One Hundred and Ten Naira) only. Since these costs must be borne out of counterpart funds, it should be included in the overall project budget.

### **Monitoring and Evaluation**

In order to successfully complete the resettlement management in accordance with the implementation schedule and compliance, monitoring and evaluation of the RAP implementation will be a continuous process and will include internal and external monitoring. The Delta NEWMAP Safeguard Officer will play a key role in reporting the progress of implementation as well as compliance to the SPMU and the World Bank.

### **Review and Disclosure**

This RAP is expected to be subjected to public review and should be disclosed to the general public for review and comment at designated locations in Delta State and in World Bank Info Shop. Display centers will include Delta NEWMAP SPMU office, NEWMAP FPMU office, EA Department of FMEnv, Office of State Commissioner for Environment, LGA NEWMAP Liaison office, Project Community, and Office of the State Commissioner for Local Government matters.

## 1.0 INTRODUCTION

### 1.1 Purpose

This Resettlement Action Plan (RAP) for Jesse Flood and Erosion Intervention Project has been prepared in support of the Nigeria Erosion and Watershed Management Project (NEWMAP) being implemented in Delta State of Nigeria. The Jesse flood and erosion control project will prevent continued perennial flooding in Jesse town located in Ethiope West Local Government Area (LGA) as well as help reverse land degradation due to erosion within Jesse town. Essentially, all areas of the town suffer from the effects of flooding and erosion. This RAP specifically identifies, evaluates and documents the set of mitigation, monitoring and institutional actions to be undertaken to eliminate identified adverse community or individual social and livelihood impacts before commencing the remedial construction and rehabilitation works.

The Report also includes measures needed to implement the identified actions, addressing the adequacy of the monitoring and institutional arrangements and also provides guidelines to stakeholders participating in the mitigation, including rehabilitation/resettlement operations in order to ensure that project affected persons (PAPs) will not be impoverished by the adverse social impacts of the project.

### 1.2 Project Background

NEWMAP was initiated by the Federal Government of Nigeria (FGN) to help reduce soil erosion vulnerability and to develop watersheds in participating States of Nigeria, and is funded by the International Development Fund (IDF)/World Bank (WB), Global Environment Facility (GEF), the Special Climate Change Fund (SCCF), and the Federal Government of Nigeria (FGN). The project initially commenced in seven southern States of Nigeria namely, Abia, Anambra, Cross River, Ebonyi, Edo, Enugu and Imo States. However, twelve additional states including Plateau, Kogi, Kano, **Delta**, Oyo, Gombe, Bornu, Katsina, Akwa Ibom, Nasarawa, Niger and Sokoto have since joined the programme. Delta State is located in the South-South geopolitical zone of Nigeria and is known to be under severe flood and erosion problems. Figure 1.1 shows the location of Delta State within the South-South of Nigeria and Figure 1.2 shows the location of Ethiope West LGA in Delta State.

Fig. 1.1: Map of Nigeria Showing Delta State

Fig. 1.2: Map of Delta State Showing Ethiope West LGA

The development objective of NEWMAP is to rehabilitate degraded lands and reduce long-term erosion vulnerability in target areas. In Delta State, NEWMAP activities involve medium-sized civil works such as construction of infrastructure and/or stabilization or rehabilitation in and around flood plains and erosion gullies. The lead agency at the FGN level is the Federal Ministry of Environment (FMEEnv), Department of Erosion, Flood and Coastal Zone Management. The Delta State Government (DTSG) is responsible for the implementation of NEWMAP activities at the State level with the lead agency being Ministry of Environment, Delta State.

### **1.3 River Ethiope and Jesse Flooding History**

Jesse town is the main town in Idjerhe clan within the heartland of the Niger Delta. The town is 55 km from Warri the major oil city of Delta State. Land elevation is generally less than 50 m above mean sea level and there is a marked absence of imposing hills that rise above the general land surface.

River Ethiope is the principal river that drains Jesse community and eventually empties into the Atlantic Ocean. The region is prone to flooding during the wet season mainly because of the heavy rainfall, high groundwater table and the flat-floored valleys. The River's source is in Umuaja in Ndokwa LGA of Delta state, flows westward traversing various communities including Jesse town and covering a distance of 96.6 km. The river flow is perennial with the highest level and discharges during July to November of each year. The upper watershed areas naturally release their surplus water directly unto Jesse catchment area of lower elevations resulting in severe flooding of the area. The flooding is exacerbated by poorly designed, inadequate and heavily silted drainage channels crisscrossing the entire community.

### **1.4 Project Rationale:**

The Jesse flood is one of the many ecological challenges creating severe structural and environmental damage to residential and commercial properties, and farmlands as well as causing unprecedented siltation of Ethiope River and adjoining community streams. Within Jesse town, many key inter and intra-community roadways have been either continually flooded or seriously degraded by erosion making the roads unusable or difficult to navigate. The affected flooded areas include neighborhoods adjoining Doge road, Atiwor road, Market road, Ukuedejor road, and College road. Because of the density of infrastructural developments in these flooded areas, the adverse impacts have increasingly been devastating to the residents with each cycle of the rainy season. In an effort to redress the impacts of flooding and erosion on Jesse community, the DTSG has targeted to rehabilitate and remedy the flood plain through the NEWMAP. The satellite view of the Jesse flood plain is shown in Figure 2.

The Jesse flood control project requires the expropriation of land for the construction of necessary flood control channels as well as the rehabilitation of the existing roads. The need for land acquisition for the project and the associated social impacts trigger the WB policy on involuntary resettlement (OP 4.12). The Resettlement Policy Framework (RPF) for NEWMAP indicates that the number of potential project affected persons (PAPs) in the sub-projects would be less than 200. According to OP 4.12, this would normally require the preparation of an Abbreviated Resettlement Action Plan (ARAP) as the social/livelihood safeguard for the sub-project. However, because the Jesse flood affects the heavily populated areas of the town with critical infrastructure and houses, the number of affected persons is greater than 200. Consequently, a Resettlement Action Plan (RAP) is required.

This RAP has been prepared to conform to the requirements of the Bank and Nigerian national social policies, guidelines and assessment procedures as well as

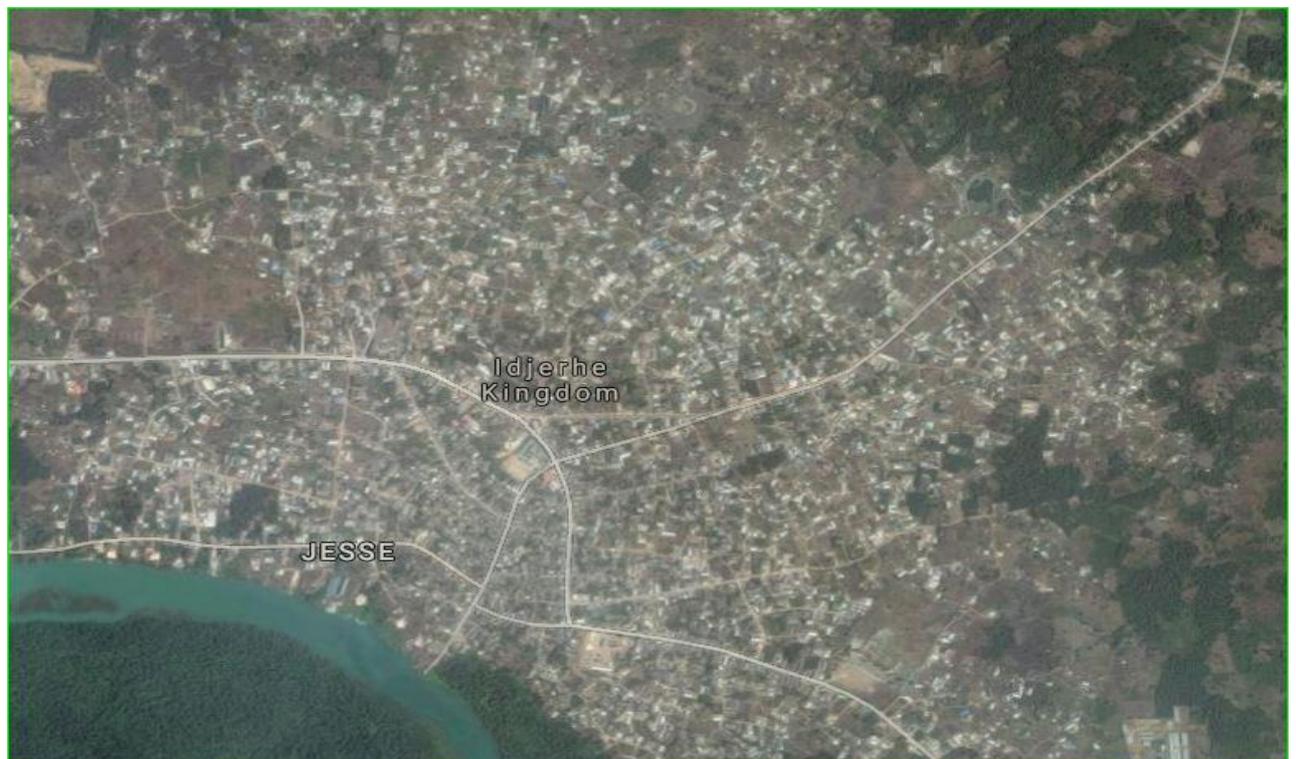

those of Delta State and the Local Agencies.

**1.5 RAP Objectives:**

The WB Policy requires that persons involuntarily resettled resulting from a project supported by the Bank, have an opportunity to restore or improve their level of living at least to the pre-project level. Project affected people are required to participate in the benefits of the project and should be given options to restore or improve their previous level of living.

The objective is to prepare a RAP for the flood and erosion control project to specifically identify and assess the human impacts that may be associated with the planned flood intervention as designed and all other activities aimed at rehabilitating the flood plain and their impacts on lives and livelihood. The set of mitigation, monitoring and institutional actions to be carried out before, during and after site remedial construction and rehabilitation works have also been identified, evaluated and documented. These will help to eliminate any identified adverse socioeconomic and livelihood impacts or reduce the impacts to acceptable levels.

The affected villages of Jesse main town and Atiwor will be mobilized to contribute actively to project implementation and to sustainably maintain the works following implementation. The RAP will include measures necessary to implement identified actions, addressing the adequacy of the monitoring and institutional arrangements for resettling all affected persons within the project area on a sustainable basis. The mitigation measures adopted will be guided by and consistent with recommendations in the Resettlement Policy Framework (RPF) for NEWMAP.

**Fig. 2: Satellite View of Jesse Flood Plain**

## **2.0 DESCRIPTION OF PROPOSED INTERVENTION AND PROJECT AREA OF INFLUENCE**

### **2.1 Site Location**

Delta State is located in the South-South geopolitical zone of Nigeria in the Niger Delta region of the country. Jesse is situated in the western part of the Niger Delta, south of latitude 6° N and occupies an area of about 500 km<sup>2</sup>. It is bounded by latitudes 5°15'N and 6°00'N and longitudes 5°40'E and 6°25'E. River Ethiope is one of the principal rivers that drain Jesse town.

### **2.2 Project Activities**

Based on the engineering design report by Aurecon Consulting Engineers Nigeria Limited for Jesse flood intervention project, the proposed flood control measures will include the following as main features:

- Reinstatement of road surfaces (6.5 m wide with 3 x 150 mm layers) with asphalted surface;
- Reinstatement of side drains (Side drains varying in size from 0.5 m wide x 0.6 m deep to 0.75 m wide x 0.85 m deep)
- Tying in of side roads (with side drains) into this system to alleviate surrounding areas. It is proposed that approximately 100 m of these side roads be surfaced to ensure proper and long term drainage into the main system.
- New rectangular concrete culvert in middle of road reserve underneath the reinstated road
- Trapezoidal shaped Articulated Concrete Channel through expropriated land. Size of channel to be 3.0 m wide x 1.5 m deep x 1:2 x 1:2 side slope.
- Steel grate in front of openings (especially on the inlet side) to protect the community from entering the system. It will also assist with control of debris and litter from entering the system;
- The system will incorporate an in-line litter trap to account for all the litter in the proposed trapezoidal channel system;
- A berm will be designed to protect the properties on the river bank near the outfall. This is to prevent flooding of properties on the river bank.

The proposed remedial design requires the routing of existing road side drains towards through build up areas; thus expropriation of assets/properties will be required.

#### **Civil Construction Works:**

- The key activities in putting up the civil works include:
  - Soil cutting and filling
  - Concrete casting
  - Assembling of structures, and,
  - Slope stabilization.
- The foundations of the lattice structures and concrete casting may be dug mechanically. The depth will be consistent with the geotechnical study and the engineering designs.
- Vegetation clearing will be done manually.
- A number of transport vehicles shall be employed in the project but there will be no on-site maintenance of vehicles.
- Powered equipment is expected to be used in the construction (as required) as well as earth moving equipment such as excavators, compactors, bulldozers and pay loaders;
- Skilled and unskilled labour shall be employed in the project.

High point preventing drainage to river Ethiopie  
- No secondary drainage path

Flooding of properties and ponding in streets

Excessive litter to river, hygiene problems due to standing water, siltation of infrastructure

New culvert underneath upgraded road.  
Flooding on upstream due to level of culvert  
No defined drainage direction on downstream side (high point)

Dual rectangular road side-drains  
- Silted closed

Erosion gully adjacent to road and flooding of properties  
- Side drain removed/broken  
- No defined outfall

Flooding and subsiding of houses

Localised ponding, flooding of properties

### **3.0 POLICY, LEGISLATIVE AND ADMINISTRATIVE FRAMEWORK**

#### **3.1 Overview**

In developing the RAP, the various laws in Nigeria and Delta State, the WB Safeguard Policies and international conventions which are relevant to land use and resettlements were reviewed. This RAP has been developed in line with these laws and regulations. It is also a requirement of the World Bank that any Bank assisted project/programme must comply with the provisions of OP 4.12 on involuntary resettlement for impacts associated with land acquisition and displacement. The several statutes that handle the issue of land, infrastructure development and resettlement are summarized below. The following sub-sections give a brief description of what constitutes land related legal issues in Nigeria.

#### **3.2 Nigerian Land Related Legal Issues**

Interests in land broadly fall into two groups. Rights that are held through Nigerian traditional systems and rights that derive from the Nigerian legal system introduced and maintained through laws enacted by Nigerian governments. The former is loosely known as customary tenure bound through traditional rules (customary law). The latter body of law is referred to as statutory tenure, secured and expressed through the Land Use Act of the Federal Republic of Nigeria.

##### **3.2.1 Customary Land Tenure**

Customary Land Tenure refers to the unwritten land ownership practices by various communities under customary law. Such tenure still exists in large parts of Southern Nigeria where land has not been adjusted and registered. Its management falls under the respective traditional families and members.

##### **3.2.2 Statutory Tenure**

The basic legal framework for the acquisition of land in Nigeria is the Land Use Act under the laws of the Federation of Nigeria, 1990. The Land Use Act 1978 of Nigeria, Chapter 202 vests all land within the urban areas of any Nigerian State in the Executive Governor of that state. Land within the rural areas of the state is vested on the Local Government. The law provides for compensation to the holder of any land title when such land is to be acquired for public purposes. For developed land, the Governor (in the case of urban areas) or Local Government (in the case of rural areas) may, in lieu of compensation, offer resettlement in any other place as a reasonable alternative accommodation and in acceptance of resettlement, the holder's right to compensation shall be deemed to have been duly satisfied.

#### **3.3 World Bank Involuntary Resettlement OP 4.12**

The World Bank's Involuntary Resettlement Policy (IRP) outlines the conditions under which the World Bank will fund a project if it displaces persons or affects their social and economic wellbeing. The objective of the Bank's resettlement policy is to ensure that population displaced by a project receives benefits from it. As a prerequisite, the WB requires the preparation, in advance of the project implementation, of either a Resettlement Action Plan/Abbreviated Resettlement Action Plan (RAP/ARAP) where impacts are known or a Resettlement Policy Framework (RPF) where impacts are not known by project appraisal. This RAP document is based on the best practices and criteria of involuntary resettlement provided in the OP 4.12.

The Jesse flood control project may potentially cause the displacement of some residents of the project area leading to loss of income and other forms of livelihood impacts. The main objective of this RAP is to provide guidelines for compensating the project affected persons (PAPs) so as to ensure that their livelihoods are improved or are restored to the pre-impact level.

Land, housing, infrastructure, and other compensation should be provided to the adversely affected population, indigenous groups, ethnic minorities, and pastoralists who may have usufruct or customary rights to the land or other resources taken for the project. The absence of legal title of land by such groups should not be a bar to compensation.

### **3.4 Gaps Between Nigeria Laws and WB Policies on Land Acquisition and Resettlement**

There are similarities between key precepts of the WB OP 4.12 and Nigerian legislation. The legislation recognizes the need to offer compensation to those whose land is affected by government activities, such as compulsory acquisition where such land is envisaged to be used for the public good. Despite that, the current Nigerian legislation is however, silent on resettlement. The scope of coverage of Nigerian legislation and the WB OP 4.12 differs as well. The World Bank Safeguards favor a policy of avoidance or minimization of involuntary resettlement and recommends the design of appropriate mitigation provision in case avoidance or minimization is not possible.

Whereas both recognize customary tenure as equivalent to legal title, the WB OP 4.12 extends beyond this principle and recognizes informal occupancy as a form of customary tenure so long as such informal occupancy can be established prior to the project cut-off date. Therefore, in accordance with the legal agreement of the credit for the development of the project, the preparation of this RAP has been executed in line with the policies and guidelines as set out in the WB OP 4.12 which emphasizes that the affected persons be provided with compensation at replacement cost and supported during the transitional period to improve or at least restore their living standards to pre-displacement levels. Under WB OP 4.12, lack of legal title is no barrier in extending assistance and support to those affected by the project development. To abide by the requirements of the WB OP 4.12, the DESG/Delta NEWMAP must take the following into consideration during the resettlement and compensation of the PAPs:

- Depending on tenure category, PAPs will be provided transition assistance (such as moving allowances) during relocation; and be offered support after displacement, for a transition period, based on a reasonable estimate of the time likely to be needed to restore their livelihood and standards of living.
- In cases where in-kind replacement is not the preferred option of the PAPs, then the cash compensation will be based on the replacement cost.

The PAP without legal land documents should also be given considerations which should include the following:

- Notice to vacate land prior to development;
- Right to harvest crops in case the affected land is agricultural;
- Tenants are provided with cash compensation in lieu of unexpired lease if agricultural land is acquired; and,
- In case of loss of standing trees, owners should be compensated with cash compensation based on the market value. In case of loss of community property resources, the resource should be provided afresh or relocate to new site.

For unidentified impacts, mitigation measures will be proposed based on the Best Practices or Guiding Principle of involuntary resettlement and other regulating laws.

### ***3.5 Resolution of Gaps between Nigerian and OP 4.12 Policies on Resettlement***

The resettlement process of PAPs must recognize both provisions of the Nigerian policy on land acquisition as stated in the constitution and its legal provisions and the policy provisions of the World Bank (as provided for in OP 4.12). Where there are differences between the Bank and Nigerian requirements, Bank policy shall be applied. The provisions of RPF developed for NEWMAP provide necessary guidelines to harmonizing the Nigerian legal requirements and the WB requirements for this project. Under the RPF provisions, any loss of livelihoods or displacement resulting from this project shall be fully compensated for in accordance with the provisions of WB OP 4.12.

## **4.0 SOCIOECONOMIC AND CULTURAL BASELINE CONDITIONS**

### **4.1 Introduction**

The cultural/socioeconomic elements and characteristics of the project area considered in this Consultancy include population, land use and tenure system, social setups, economic activities, education, vulnerability profile, gender, religion, settlement and migration patterns and health services system.

Qualitative and quantitative mixed method of assessment was adopted. This offered an effective means of interacting widely with the stakeholder groups, the Delta NEWMAP team, as well as individual stakeholders and affected persons. Participatory community meetings, public discussions as well as discussions with key informants (Community elders, Local leadership, and Delta NEWMAP Officers, among others) were held in the course of the Consultancy.

#### **4.1.1 Socioeconomic Survey**

This involved detailed enumerations/inventories of households/persons resident or doing business within the project area as well as formal and informal discussions with focus groups, including the community traditional and administrative leadership. A comprehensive questionnaire for data collection was used for this purpose. The questionnaire captured the following information:

- a) Household bio-data (demographic information);
- b) Livelihoods;
- c) Inventory of structural and nonstructural assets including land, common properties, houses, economic trees and cash crops.

Also, the census of the PAPs was conducted to identify the impact on each affected person.

#### **4.1.2 Public Consultation**

This was conducted as part of the participatory approach aimed at gaining good knowledge of the social issues/risks associated with the project as perceived by the communities. Public meetings were held in the town hall at different occasions which is center of the project immediate impact areas. The locations are Doge road, Atiwor road, Market road, Ukuedejor, and College road.

#### **4.1.3 Use of Maps and GIS**

Survey maps as well as high resolution imagery were used to identify and map out the project area identifying any locations of structures relative to the project corridor. The qualitative analysis involved an assessment of information obtained during the stakeholders' consultations and public participation forums and discussions. The socioeconomic study provided necessary primary quantitative data for the project assessment. This quantitative data included:

- Household census of the people identified as PAPs;
- Establishing the socioeconomic profile of the project area population including health related status of respondents;
- Establishing the structural assets to be affected by project;
- Establishing area of land to be affected;

## **4.2 Cultural Environment**

### **4.2.1 Population**

Based on 2017 population projections using the 2006 Nigerian National Census records and the 2.9% annual population growth factor recommended by the national population commission (NPC), Ethiopie West has a population of 203,592 and Jesse town with a population of 7,000.

#### **4.2.2 Ethnic Group**

The people of Jesse consist of one major Nigerian ethnic group – the Urhobos. The ethnic group has its unique culture, social organization and traditions. The social and cultural aspects of the people in the area are closely intertwined within the ethnic group. The Urhobos have elaborate cultural practices that include strong kinship linkages with organizations spanning from localized social groups to strong clan relations. The cultural associations and social interactions are epitomized during cultural and religious ceremonies and festivities. The people generally speak and write mainly the Urhobo and English languages.

The Jesse community consists of groups of households whose families are inter-related via marriages. The local dwellers rear goats and sheep and maintain chicken farms most of which are carried out within their residential compounds. Clans are the basic point of cultural and political identity for the citizens. Clanism and kinship are the elemental forces in control of political and cultural institutions as well as service points.

#### **4.2.3 Religion**

The people of Jesse are predominantly of Christian religion mostly Catholics and New evangelical denominations. There are however a few traditionalists in the community.

#### **4.3 Land Use Pattern**

There are three major types of customary land tenure system in Urhobo land: (1) individual land ownership; (2) family land ownership; and (3) communal land ownership. Individual ownership may be for indigenes or for residents of the community. Family lands (as well as individual lands) are inherited from generational relatives. Communities retain family lands which may or may not be sold. The family lands are generally retained for communal development and sometimes are rotationally shared among the members of the community for agricultural purposes.

Jesse land is about 65% developed for both residential and commercial purposes, and the community may be characterized as semi-urban area mainly involved in fishing and trading.

##### **4.3.1 Cultural Resources**

There are no known designated historical, archaeological or cultural resources within the project area. However, a shrine exists at the location close to the project corridor but will not be affected by the project except for increased human movements in the vicinity of the shrine during project construction.

#### **4.4 Analysis of Socioeconomic Survey**

The measurement of precise impacts of the project on persons living or earning their living along the flood corridor cannot be effectively established without appropriate and accurate social and economic baseline data. The socioeconomic study will help to assess the socioeconomic changes that may occur in the living conditions of the project area population as a result of the project impacts.

##### **4.4.1 Objectives of the Socioeconomic Survey**

The primary objectives of the socioeconomic survey are as follows:

- i) To collect information regarding existing socioeconomic conditions of the project population;
- ii) To use the collected socioeconomic information to develop baseline data for the assessment of socioeconomic impacts of the project;
- iii) To analyze the patterns of relationships that exist among various

- socioeconomic or demographic components of the project area;
- iv) To obtain perceived views of respondents on the effects of project on the environment and their vulnerability to socioeconomic changes due to the project; and,
- v) To provide a benchmark for any further information needed to monitor and evaluate improvements in the future.

The respondents to the socioeconomic survey included the following:

- 1) Owners of any buildings or structures located within 10 meters from the edges of the specific Roads designated as corridors for the key drainage channels;
- 2) Owners of any buildings or structures located in areas to be used as construction staging areas during the construction phase of the project;
- 3) Residents/tenants of the buildings or structures identified in items (1) and (2) above whether the structures are permanent or temporary; residential or commercial;
- 4) Land owners along the proposed key drainage channelization corridors whose lands would be required for the purpose of the project;
- 5) Economic trees/crops owners within the land areas required for the purpose of flood control.

The socioeconomic survey was conducted in conjunction with the census of the project affected persons to profile the impacted project area and provide baseline data against which mitigation measures and support will be measured. The analysis is based on respondents to the questionnaire administered to residents of the area who are most likely to be impacted by the project. On the basis of the responses obtained in the exercise, the following determinations are made.

#### 4.4.2 Respondent and Household Distribution in Project Area

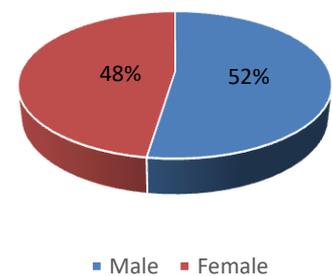

The following Sections show how the residents of the project area responded to the socioeconomic survey administered to them. A total of 170 questionnaires were administered with a 100% return. The 170 respondents have a total of 1017 household members. The respondents to the socioeconomic survey and the corresponding household members are distributed across the six specific control routes that constitute the proposed flood control channelization corridors.

#### 4.4.3 Gender, Age and Household Size Distribution

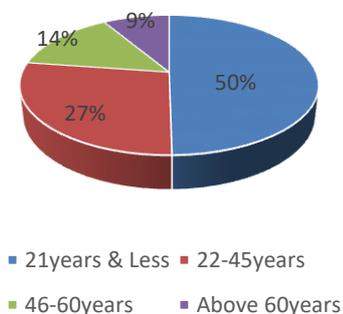

The survey data indicated a male/female ratio of 48/52% for households in the project area. The household gender data for the community is reflected in Figure 4.1.

The women in the project area are mainly involved in traditional agriculture and home-keeping; while the men are more mobile than the women as they are more involved in the pursuit to provide for the family.

**Fig 4.1: Gender Distribution of Households**

**Fig 4.2: Age Distribution of Households**

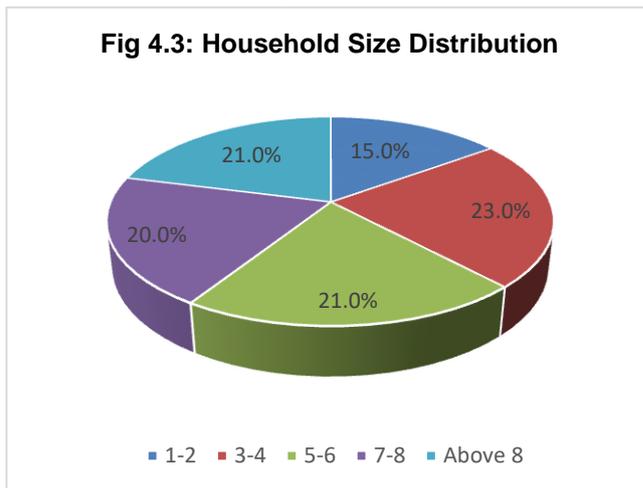

The age distribution data of the (Figure 4.2) of the respondents' household members indicated that 50% of the household members are 21 years of age and below while 9% are in their 60s and above. The survey further showed that 27% of

the household members are within the youthful ages of between 22 and 45 years while 14% of the household members are between the ages of 46 and 60 years.

The low percentage of the number of household members of ages 60 and above is reflective of urbanization effect in the area. There is clearly an increasing trend of youthful persons taking up residency within project area as reflected in the percentage of youths in the households (Figure 4.2).

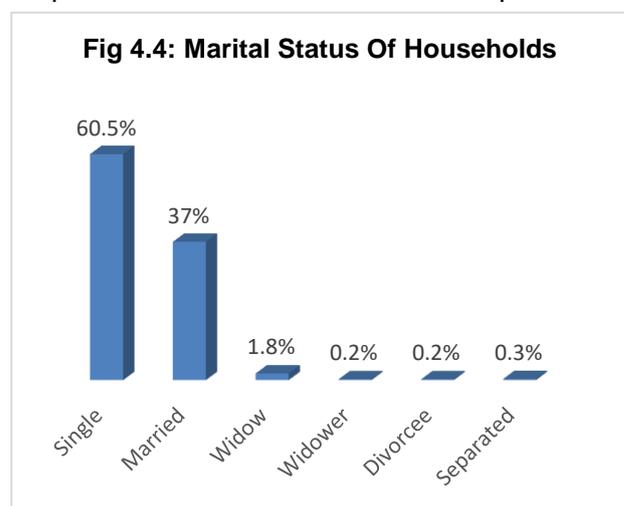

The respondents' household size distribution from the survey ranged from a minimum of one person to a maximum of 10 persons. The average size of households is 5 persons for the respondents. On the extreme household size ends, 15% of the respondents have household sizes of one to two members while 21% have household members of more than 8 persons (Figure 4.3). The majority (23%) of the respondents show household sizes of 3 or 4 persons and 21% showed sizes of 5 or 6 persons. The data showed 20% of respondents have household sizes of between 7 and 8 persons.

The data showed 20% of respondents have household sizes of between 7 and 8 persons.

#### 4.4.4 Marital Status

Figure 4.4 showed the marital status of respondents in the project area. About thirty seven percent (37%) of the respondents are married while about 60.5% are single. Approximately two percent (2.0%) of the respondents are widowed while 0.5% of the respondents are either divorced or separated.

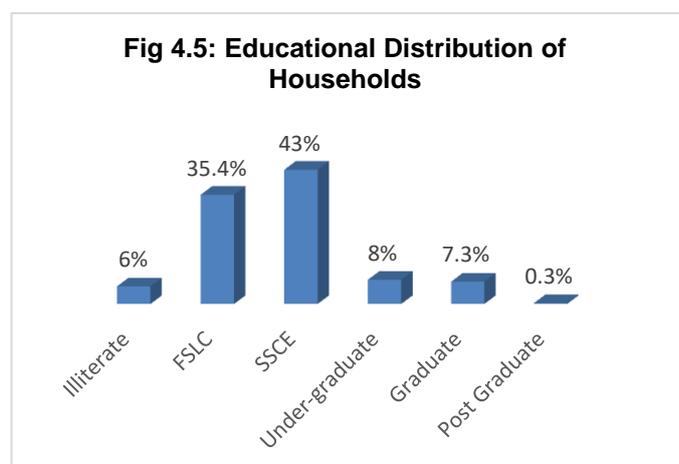

#### 4.4.5 Access to Education

The survey responses indicated that only 6% of the population of schooling age never attended school (Figure 4.5). The level of basic education for the surveyed households is relatively high with 94.0% of the surveyed population having attained the basic primary (FSLC) level of education or higher. The data further showed that 7.3% of the population graduated from universities while 78.4% attended and/or graduated from the primary and secondary education. This high

literacy level within the project affected area is also a reflection of the literacy rate in the Jesse community as a whole.

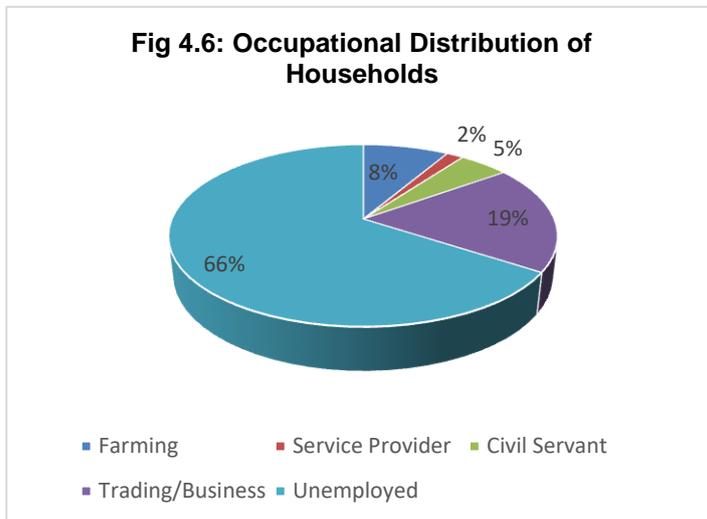

#### 4.4.6 Occupational and Income Distribution

The occupational distribution data from the questionnaire indicated that 66% of surveyed households are either unemployed or are students. Only

about 8% are engaged in farming, 19% are self-employed while 7% are employed in either the private sector or civil service (Figure 4.6).

The main source of income for the households surveyed came from trading/business across the community. About 19% of the respondents reported owning a business or being self-employed. A significant number of persons (27%) in the community are unemployed. Based on the income data provided by respondents in the survey, 42% of households in the area covered earned less than N20,000 monthly with 6% earning between N30,000-45,000 monthly (Figure 4.7). Worthy of note is that over 32% of the households in the community earned more than N60,000 per month. The margin of error in the information provided on

incomes may be significant considering that some of the respondents may have grossly inflated data provided with the intent to receive compensations in accordance with incomes indicated in the survey. The data provided could not be independently verified.

incomes may be significant considering that some of the respondents may have grossly inflated data provided with the intent to receive compensations in accordance with incomes indicated in the survey. The data provided could not be independently verified.

#### 4.4.7 Desirability of the Project

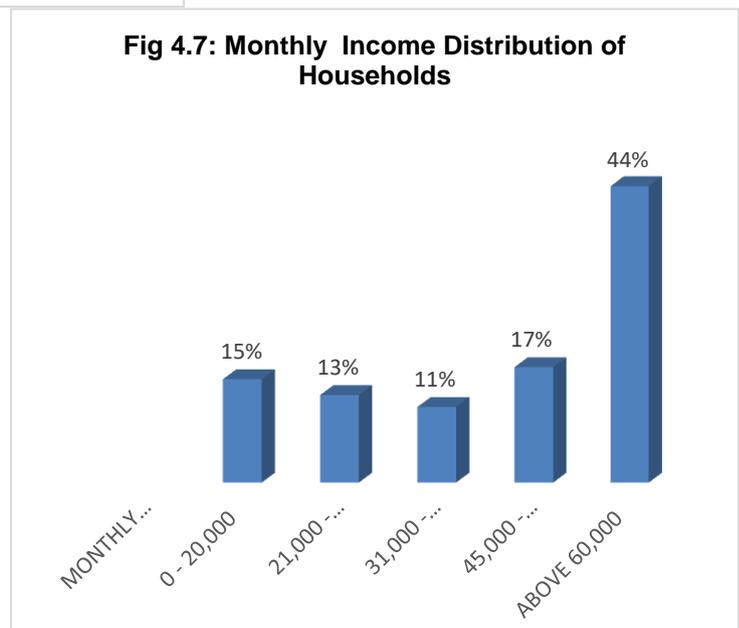

All the respondents in the survey (100%) indicated immense desirability for the project to proceed. Many of them expressed a clear wish for the project to proceed before the next round of rainfall.

#### 4.4.8 Conflict Resolution

Most respondents in the survey (98%) prefer and find it most convenient to have conflicts resolved through informal traditional modes. The court system is seen as an alternative means of resolving issues. About 1% of respondents consider the court system as a first mode of conflict resolution while another 1% is indifferent.

#### 4.6 Household Waste Disposal

Solid waste management in the project area is a considerable hazard to the health of the population and the effective functioning of the stormwater drainage systems. Domestic refuse is disposed randomly outside the residential compounds and the flood-prone areas are also treated as de facto waste disposal areas. Unmanaged refuse disposal causes regular obstruction of the stormwater drainage systems. The depicted situation in the project area is a clear reflection of the limited management and implementation of waste disposal mechanisms in most part of the state as well as the nation with majority of households disposing of their domestic refuse outside

their compounds. During the wet season waste is washed through the presently unplanned drainage paths leaving a trail of refuse.

#### **4.7 Health Services**

There are no hospitals in any of the areas involved in this project. However, in Jesse, there is a rural health center administered by visiting medical personnel. No health centers are maintained along Doge road, Atiwor road, market road and college road possibly because of their proximity to Ukuedejor road which is the town hall route.

Information/data obtained from respondents indicate that common diseases are diarrhea, malaria, typhoid, pneumonia, cough, skin diseases, deficiency diseases, eye diseases, ear diseases, and waterborne diseases due to malnutrition and lack of hygiene. The quality of the healthcare services in the project area is generally poor. Most people go to quacks and medicine shops for minor medical treatment.

#### **4.8 Community Participation**

The direct involvement and active participation of relevant stakeholders and the local level people in the planning and management processes of the project assures that any potential disharmonious issues within the community are resolved speedily. There will also be maximization of resource use and increased benefits and expanded opportunities for the communities in the project area.

Community participation improves understanding of the project and communication between the SPMU, the contractors and the community. The decision-making process for the project will also be enhanced by actively involving relevant stakeholders, especially the project affected persons and organizations with a stake in the project.

**Table 4.1: Summary of Findings for All Socioeconomic Indicators**

<b>S/No</b>	<b>Socioeconomic Indicator</b>	<b>Findings</b>
1	Population	Delta State has a population of 4,112,445 (Males – 2,069,309 and Females – 2,043,136). The survey data indicates that the project area has a 2-6% margin of difference between the population of males and females in Jesse at the household level. This appears to reflect the state ratio for males and females. At the respondent level, the trend seems to be sustained in project area.
2	Ethnic Groups and Language Spoken	The people of Jesse consist of one major Nigerian ethnic group – the Urhobos. The people generally speak and write mainly the Urhobo and English language. Clanism and kinship are strong elements and driving forces in control of political and cultural institutions and service points. The community consist of groups of households whose families are inter-related through marriages.
3	Religion	The members of Jesse community are predominantly of the Christian faith, mostly Catholics and new evangelical denomination.
4	Land Use System	Three major types of customary land tenure system exist in the four villages, viz: – (1) individual land ownership; (2) family land ownership; and. (3) communal land ownership. Individual ownership may be for indigenes or for residents of the community. Family lands (as well as individual lands) are inherited from generational relatives. Communities retain family lands which may never be sold but mostly used for agricultural purposes. About 30% of land is committed to agricultural production sales of food

S/No	Socioeconomic Indicator	Findings
		crops which include maize, cassava, yams, plantain, vegetables, etc.
5	Household Distribution in Project Area	Based on the survey, 170 respondents with 1017 household members were documented in Jesse
6	Gender, Age and Household Size of Respondents	The age distribution data (Figure 4.5) of the respondents indicate that 91% of Jesse respondent households are below the age of 60 while 9% are in their 60s and above; The survey further shows 50% of the households are below the age of 21 years; 27% are between the ages of 22 and 45 years; 14% are between the ages of 46 and 60 years while 9% are above the age of 60 years. Household distribution in project area range from 1-10 persons with an average size of households of 5 persons for Jesse affected areas, respectively.
7	Marital Status of Respondents	60.5% of the households are single, 37% are married, 1.8% are widow, and 0.2% are widower while 0.2% and 0.3% are divorcee and separated respectively
8	Access to Education	There is relatively moderate literacy level in Jesse with 94% of the surveyed population having attained the FSLC level of education and higher. However, about 6% of respondents not having attained the minimum of primary education appears on the high side.
9	Occupational and Income Distribution of Respondents	The occupational distribution data shows a high rate of unemployment in Jesse (66%). This situation could pose a serious social risk when not properly managed.
10	Household Waste Disposal	Household wastes are indiscriminately dumped at illegal dumpsites adjacent to the river corridor. Solid waste management is a considerable hazard to health and the effective functioning of the stormwater drainage systems. Unmanaged refuse disposal causes regular obstruction of the stormwater drainage systems.
11	Health Services	Records show that common diseases in project area include diarrhea, malaria, typhoid, pneumonia, cough, skin diseases, deficiency diseases, eye diseases, ear diseases, and waterborne diseases due to malnutrition and lack of hygiene. The quality of the health services in the project area is generally poor. Most people go to quacks and medicine shops for minor medical treatment.
12	Desirability of Project	100% of survey respondents indicated immense desirability for the project to proceed.
13	Conflict Resolution Mechanism	About 98% of survey respondents prefer that their conflicts be resolved through informal traditional modes of conflict resolution. About 1% favour resolution through the court system. About 1% of the respondents are indifferent.

## **5.0 PUBLIC PARTICIPATION AND CONSULTATIONS WITH STAKEHOLDERS**

### **5.1 Objective of Community Consultation**

The objectives of the public participation and consultation process are:

- (i) Solicit inputs, views and concerns from the affected Jesse community as they relate to the project and obtain local and traditional knowledge that may be useful for decision-making;
- (ii) Facilitate consideration of alternatives, mitigation measures and trade-offs, and ensure that important impacts are not overlooked and that benefits are maximized;
- (iii) Reduce conflict through the early identification of contentious issues; and increase public confidence in the project.
- (iv) Provide opportunity for the public to influence the project designs and implementation in a positive manner and improve transparency and accountability in decision-making;

### **5.2 Public Participation Process**

The potential project affected individuals and group of persons identified as stakeholders in this project include those who live in close proximity to the channelization corridor; those who by virtue of their proximity to the project site will be directly affected by noises, odors or activities; those who may be forced to temporarily relocate because of the project; those who have interest either traditionally or administratively, over developmental activities or policy changes in the project area (they may or may not necessarily live in the proximity of the project); and, those who infrequently use the land on which the project is located.

Community consultation was driven in a manner that encouraged active and sustained participation of the Jesse community members, particularly the corridors through which the proposed drainage channels will traverse. This was to promote community ownership of the project and to enhance sustainability.

A pre-defined socio-economic questionnaire at the household level was administered for the Jesse community. The consultations will remain an ongoing exercise throughout the duration of the project to give the community the opportunity to make contributions aimed at strengthening the development while avoiding negative impacts as well as reducing possible conflicts. Issues relating to project displacements and compensations, particularly with the project affected persons will continue to be handled to minimize chances of possible conflicts.

#### **5.2.1 Stakeholders' Identification**

Generally, five broad categories of stakeholders were identified by the Consultant for this project based on the degree to which the project activities may affect or involve such persons or group of persons. These stakeholders are grouped as shown in Table 5-1.

The adopted process consists of:

- i) Identification of any parties whose line of duties whether officially, socially, economically or culturally have direct or indirect bearing on any aspects of project activities. These parties may include individuals, groups, institutions or organizations that may be affected by the gully remedial activities;
- ii) Establishment of the stakeholders list and identification of specific stakeholder interests in relation to the project. The issues considered include: (a) the project's benefit(s) to the stakeholders; (b) potential changes to the routine activities of the stakeholders that may occur due to the project; and, (c) the project activities that may cause damage or conflict for the stakeholder;

Table 5-2 gives an initial list of identified stakeholders including their activities and operational areas in the communities traversed by the project. The list includes government functionaries, NGOs, FBOs and CBOs, among others.

**Table 5-1: Identified Stakeholder Groups**

GROUP	DESCRIPTION	ROLE(S) IN COMMUNITY PROCESS
Group-1	Individuals or group of persons whose day-to-day lives/livelihoods may be directly affected by project activities. These are people who either reside within 10 m of the proposed channel or those that carry out their daily livelihood activities close to the corridor.	The identified persons or group of persons in this category may ultimately represent the project affected persons (PAPs) or households (PAHs)
Group-2	Individuals or group of persons whose day-to-day traditional or administrative functions include oversight of developmental activities within the project area.	This category of persons serves as mobilization points around which the Consultant will reach out to the other members of the community.
Group-3	Individuals or group of persons whose daily activities (including farming) bring them in close proximity to the project area. These are people who either reside or carry out their daily livelihood activities outside the proposed drainage channel corridor but within the communities in which the project is located.	This category of persons may or may not be affected by the project but may be significant contributors to the long term sustainability of the project.
Group-4	CBOs, FBOs and NGOs who provide frequent interface with the community members who may be directly or indirectly affected by the project activities.	This group of organizations essentially provides on a continuous basis spiritual and physical welfare as well as environmental health of the community.
Group-5	Individuals or group of persons who are political office holders and have significant responsibilities toward community members and developments within the project areas.	This group of individuals is collectively responsible for the political and general socio-economic development of the community, among others within their respective geo-political zones.

**Table 5-2: List of Stakeholders and Their Responsibilities**

GROUPS	IDENTIFIED STAKEHOLDER	AREA OF INTEREST IN PROJECT
Group-1	Residents along the specific project corridor	PAPs/PAHs
Group-2	Office of the Chairman of Jesse Watershed Management Committee	Development and welfare of Project community
	Office of the President General, Jesse Development Union	Development and welfare of Jesse Town
	Office of the Traditional Ruler, His Royal Majesty (HRM) Otadaferua Edward (JP) Erhiekevwe 1, Ovie of Idgere Kingdom	Development and welfare of Idgere Kingdom
Group-3	Residents of Jesse Town	Individualized livelihood issues
Group-4	Community-based Organizations (CBOs)	Watershed protection and management
	Faith-based Organizations in the Town (churches)	Community spiritual and physical welfare
	Non-governmental Organizations (NGOs)	Protection of environmental health of the community
Group-5	Office of the Chairman – Ethiope West LGA	Development of the Ethiope West LGA
	Office of the Hon. Member – Delta State House of Assembly	Development of the Ethiope West in the state constituency

GROUPS	IDENTIFIED STAKEHOLDER	AREA OF INTEREST IN PROJECT
	Office of the Hon. Member – Ethiope East & West Federal Constituency	Development of Ethiope East & West federal constituency
	Office of the Distinguished Senator – Delta South Senatoral Zone	Development of Delta South Senatoral Zone

### 5.2.2 Community Consultations and Meetings

On January 28, 2018, the RAP Consultant in the company of officers of the SPMU visited the Traditional Ruler of Jesse, His Royal Majesty (HRM) Otadaferua Edward (JP) Erhiekevwe 1, Ovie of Idgere Kingdom and members of his royal cabinet. The goal of the meeting was to harmonize understanding of the issues associated with the project viewed from the community standpoint and to discuss how best to effectively approach the mobilization of the community members towards the project. Other persons at the meeting include the President General of Jesse Community, the Chairman of Jesse Watershed Management Committee and members of the Committee as well as other leaders of Jesse community.

Following the initial meeting with the traditional ruler, the Consultant held an expanded meeting with members of the Jesse community and other stakeholders on Saturday, February 3, 2018 to brief the members of the need for the RAP, the scope of the consultancy, and the expectations from them. A total of three public/stakeholder consultation sessions were held between February 3 and March 6, 2018. Additionally, three focus group discussions (FGD) were also held on March 21, 2018 involving the community elders, women and the youths, respectively.

At the meeting of February 3, 2018 the Traditional Ruler and his Cabinet received the visiting team with traditional kola-nuts following which the Consultant explained the purpose of the visit (NEWMAP and the Jesse flood and erosion intervention), the project scope and RAP consultancy. HRM expressed his appreciation on behalf of Jesse Town and commended the NEWMAP initiative to address the Jesse flood problem which has caused so much destruction in the community. He then offered his royal blessings and promised full support and cooperation of his people for the intervention.

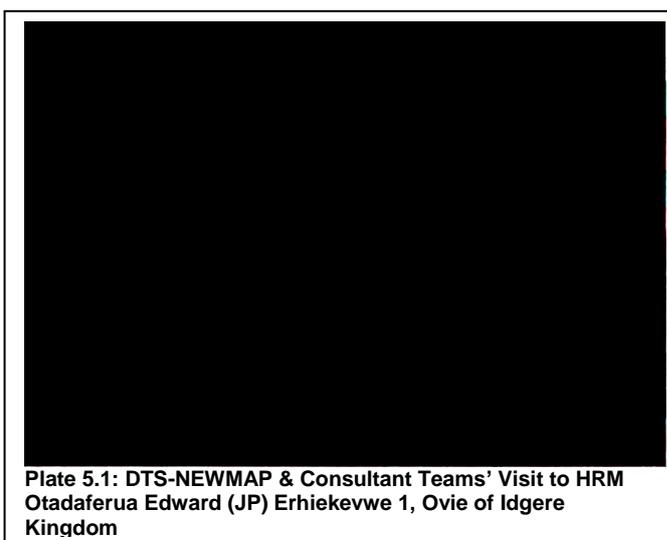

Plate 5.1: DTS-NEWMAP & Consultant Teams' Visit to HRM Otadaferua Edward (JP) Erhiekevwe 1, Ovie of Idgere Kingdom

Plate 5.2: Visit to HRM – Community Chairman Addressing HRM and the Audience

The community meetings discussed the need for the project and the associated potential impacts to the community members living or farming within the project corridor. The community members' concerns and general thoughts were solicited and

noted. The minutes of these meetings and the list of attendees are included as Annexure II. The community members particularly welcomed the project and expressed anxiety that remedial work should commence expeditiously to prevent occurrence of further erosion and flooding damages from the next rainy season. The lists of attendees to the various meetings are provided in Annexure II. It is expected that additional meetings will be held prior to the commencement of field construction work. Such meetings will include the project-affected persons and households. Issues pertaining to relocations and compensations for losses (means of livelihoods and properties) shall be discussed at such meetings.

The community consultation meetings helped to structure the participation of the stakeholders and segments of the community including the PAPs in the project process. The community members were actively and enthusiastically engaged in all matters relating to the project and eagerly assisted the Consultant in identifying pertinent socio-economic and cultural issues relevant to the project.

**Plate 5.3: Dr. Odili Ojukwu Addressing HRM and the people**

**Plate 5.4: HRM Blessing the Traditional Cola-nut for the Event**

**Photos of Consultation Meeting with the Ovie of Idgere Kingdom**

**Photos of Consultation Meeting with the Ovie of Idgere Kingdom**

**Photos of Consultation Meeting at Jesse Town Hall on February 3, 2018**

### **5.3 Social Issues/Risks**

The RAP aims at ensuring the PAPs are not worse off than they would have been without the project. It seeks to ensure that any losses incurred by the PAPs are addressed in a manner that gets them to share from the project benefits. These people should be assisted to develop their social and economic potential so as to improve or restore their incomes and living standards to pre-project or without project levels. In developing this RAP, consideration was particularly given to the peculiarities of need for disabled persons, women, children and other vulnerable groups. The key social issues that emerged through the above processes include:

1. Community safety – Concerns regarding community safety with the next cycle of the rainy season was keenly expressed. The community is quite apprehensive of continued flood and erosion effects on the Jesse populace as well as the road and drainage infrastructures, particularly in relation to safety risks posed to existing homes, human lives and farmlands;
2. Continued flooding in the area would lead to damages and loss of crops and livestock, personal possessions, spread of diseases such as typhoid, cholera, diarrhea, and malaria, and cause pit latrines to overflow;
3. Livelihoods – loss of access to roadways, crop lands and pasture.
4. Resettlement – impacts and compensation measures for economic and physical displacement during project implementation.

5. Awareness creation was necessary for the long-term success of the project; and manpower development should be included in the programme to enhance project sustainability.

#### **5.4 Guiding Principles**

In order to ensure that this RAP complies with the WB OP 4.12 and international best practices regarding resettlement, the Consultant and the Delta State NEWMAP are guided by the following principles:

*Principle 1: Resettlement must be avoided or minimized*

The project civil and biological works have been designed so as to cause the least possible displacement and/or disruption while maximizing the effect of flood and erosion control in the project.

*Principle 2: Genuine consultation must take place*

The primary concern of MOE and Delta NEWMAP is to ensure that the rights and interests of the PAPs are considered seriously as it places focus on resettlement. For this reason, local level consultative forums serve as community voices and become part of the entire project process.

*Principle 3: Establishment of a pre-resettlement baseline data*

To support the successful reestablishment of affected property, the following activities will be undertaken prior to displacement.

- An inventory of assets (landholdings and economic trees/crops) to determine fair and reasonable levels of compensation or mitigation.
- A census detailing household composition and demography, and other relevant socio-economic characteristics.

The asset inventories and census information were used to determine entitlements. The information obtained from the inventories and census shall be entered into a database to facilitate resettlement/relocation planning, implementation and monitoring.

*Principle 4: Assistance in relocation must be made available*

DTSG will guarantee the provision of any necessary compensation for people whose lands will be disturbed to ensure appropriate rehabilitation of the gully corridor, or any other disturbances of productive land associated with the project in proportion to their loss.

*Principle 5: A fair and equitable set of compensation options must be negotiated*

Compensation will be paid for land and economic trees/crops that are disturbed in accordance with the World Bank policy and rates derived from market value comparables for trees/crops.

*Principle 6: Vulnerable social groups must be specifically catered for*

Members of vulnerable groups will include people who are physically weaker, and may need special help, female-headed households, aged persons and very young children. Account was taken of this group in the consultation and planning processes, as well as in establishing grievance procedures.

*Principle 7: Resettlement must be seen as an upfront project cost*

Global experience shows that unless resettlement is built in as an upfront project cost, it tends to be under budgeted, that money gets whittled away from the resettlement budget to 'more pressing' project needs, and that it tends to be seen as peripheral to the overall project. Delta NEWMAP will ensure that compensation costs, as well as those resettlement costs that fall within their scope of commitment, are

built into the overall project budget as up-front costs.

*Principle 8: An independent monitoring and grievance procedure must be in place*

In addition to internal monitoring that will be provided by Delta NEWMAP, an independent team comprising local administrators and the community members will undertake monitoring of the resettlement aspect of the project. Grievance procedures will be made fully accessible to all affected parties, with particular concern for the situation of vulnerable groups. Monitoring will specifically take place via measurement against the pre-resettlement database.

*Principle 9: World Bank's operational procedure on forced resettlement*

The World Bank's operational policy 4.12 on involuntary resettlement will be adhered to. Displaced persons should be meaningfully consulted and should have opportunities to participate in planning and implementing resettlement programmes. Delta NEWMAP and this RAP aim to adhere to these standards.

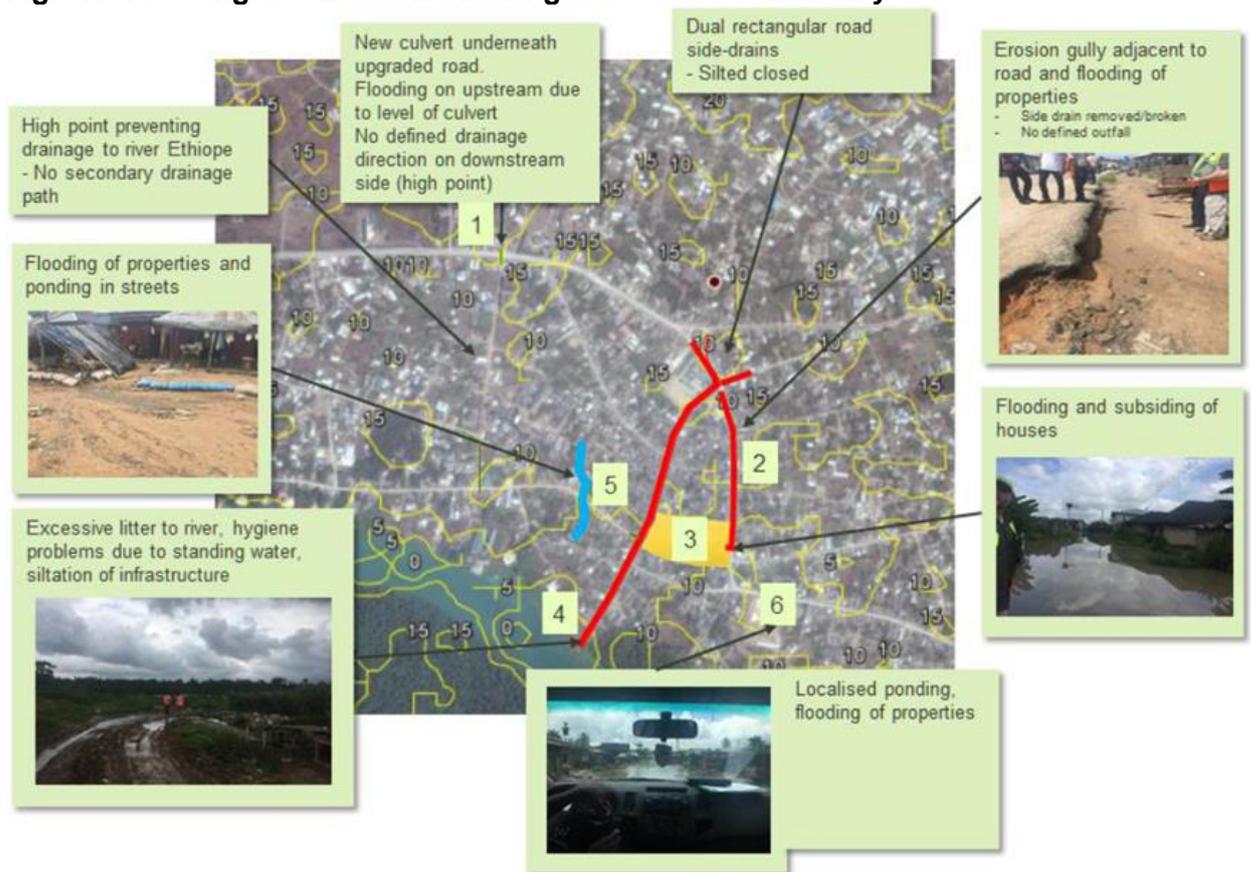

## 6.0 POTENTIAL IMPACTS OF PROPOSED PROJECT

### 6.1 Field Findings

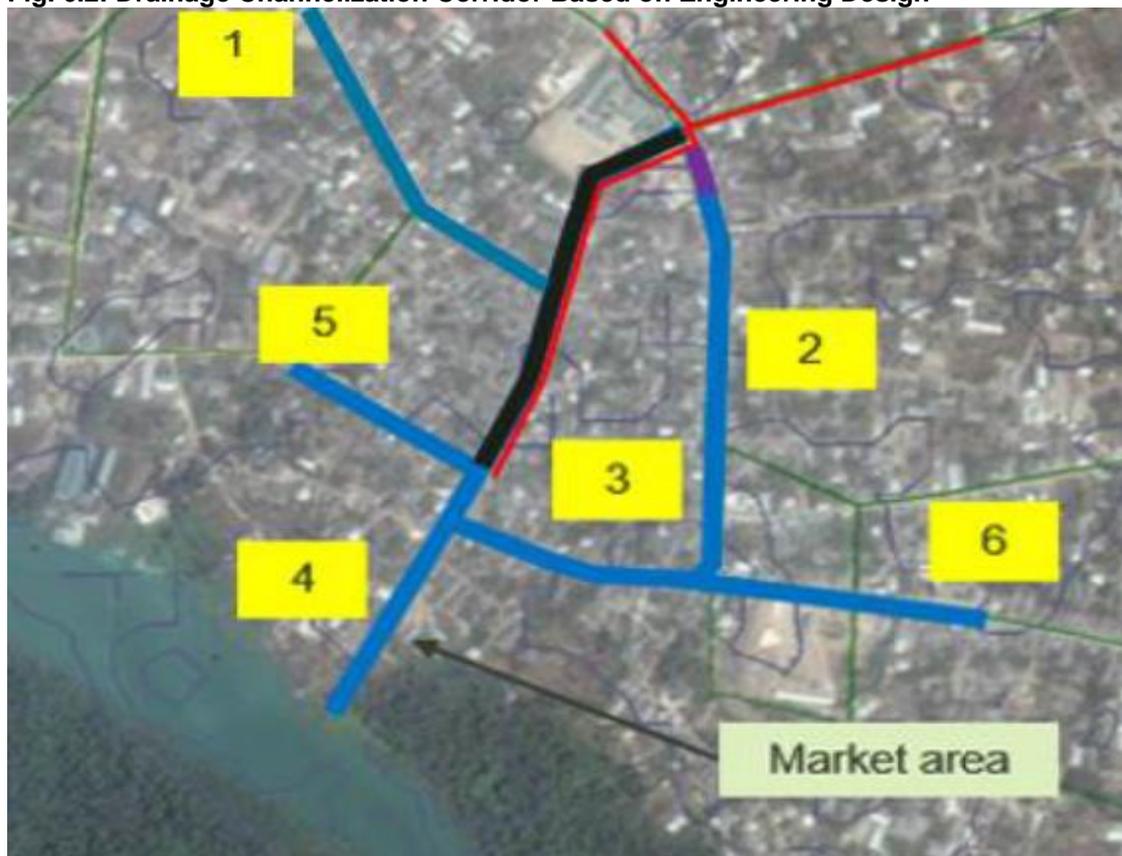

The primary project objective is the remediation and rehabilitation of the flood inundated and erosion prone Jesse community. Access to the community is through the dual carriage roadway leading from the Warri-Benin Express Road to Jesse Town. All segments of the community feeder roads are mostly submerged during heavy rainfalls. The intra-community roadways within Jesse community are currently in poor condition resulting from years of community flooding, soil erosion and roadway potting. These feeder roads require rehabilitation/upgrade to support the proposed remediation and rehabilitation project. The rehabilitation of these roads will involve re-grading of the existing paved roadways and the construction of appropriate linkage drainages..

The conditions within Jesse community is as depicted in Figure 6.1 and based on the project engineering designs, the proposed drainage channelization corridors are shown in Figure 6.2.

**Fig. 6.1: Flooding and Erosion Challenges in Jesse Community**

**Fig. 6.2: Drainage Channelization Corridor Based on Engineering Design**

The Road Sections shown in red, black and blue in Figure 6.2 are the primary corridors proposed for the flood control channelization. These road sections are also marked as 1, 2, 3, 4, 5, and 6. Table 6.1 describes these Road Sections and the nature of the works to be carried out along each corridor.

**Table 6-1: Description of Project Activities Along Identified Road Sections**

Road Section	Description	Construction Works
1	Doge Road Corridor	Road rehabilitation with side drains, protective steel grates and litter trap.
2	Ukudejor Road Corridor	Road rehabilitation with side drains, protective steel grates and litter trap.
3	College Road	Road rehabilitation with side drains, protective steel grates and litter trap.
4	Market Road	Road rehabilitation with side drains; trapezoidal concrete flood channel and concrete culverts to run underneath the road. Also protective steel grates and litter trap.
5	Atiwor Road Corridor	Road rehabilitation with side drains, protective steel grates and litter trap.
6	College Road Corridor	Road rehabilitation with side drains, protective steel grates and litter trap.

Based on the project engineering designs and Consultant field observations, several direct and indirect impacts were identified. The impacts include potential physical, economic and social effects. The designs indicate that a number of existing buildings/structures along the Road Sections will be impacted by the construction of the flood control channels and the rehabilitation of the road corridors.

## **6.2 Project Impact Areas**

### **6.2.1 Rehabilitation of Flood and Erosion Corridors**

The flood remediation and rehabilitation works along the designed channelization corridor involves civil construction works that include: soil cutting and filling, compaction of soils; concrete casting; assembling of structures, gabion-based slope stabilization and terracing. The identified project impacts are detailed in Section 6.3 below.

## **6.3. Identified Project Impacts**

The proposed project, based on the engineering designs, will potentially create both negative and positive social impacts. This section discusses these impacts and proposes mitigation measures and their management in order to reduce the negative impacts to levels of acceptance as well as enhance the positive impacts.

### **6.3.1 Positive Project Impacts**

The following positive social impacts are identified for this project:

- Flood control across the entire Jesse community;
- Arresting soil erosion and the degradation of available land;
- Emotional and psychological relief from continued damages to, or loss of properties as well as loss of remaining ancestral lands;
- Improved flow of traffic in and out of Jesse community upon completion of project;
- Improved business opportunities within Jesse community with removal of flood related physical constraints;
- Enhanced ease of travelling along Jesse community roads;
- Improved livelihoods for the area residents due to reduced cost of transportation and business penetration;
- Opening of the affected area to potential investments;
- Improved landscape vista is anticipated with a sustained corridor of economic trees within the project area;
- Several temporary employment opportunities will be created by the project. During the construction phase, both skilled and un-skilled laborers will benefit from job opportunities.

### **6.3.2 Negative Project Impacts and Mitigation Measures**

The proposed project will lead to socioeconomic effects on Jesse community members, including school children in the project area.

#### Loss of land

Land is required for the construction of the proposed flood control channels. The dimensions of the control and channels are as described in Table 6.2. The required land shall be permanently acquired for purposes indicated and shall therefore be permanently lost to the current owners.

#### Mitigation Measures:

Owners of acquired land shall be compensated in accordance with the WB and Nigerian Policies on land acquisition. Where however, there are any improvements to the land, compensations will also be considered for those improvements including any structure, economic trees and farm crops.

#### Displacement of persons

Based on the designs for this project, 286 buildings/structures abutting the proposed flood control channelization corridors will be affected by the project. Most of these structures are however very improvised in nature and are therefore temporary. Damages to existing building structures abutting the flood control channelization corridors will be kept at a minimum and the buildings/structures shall first be strengthened to gain structural stability. For the affected buildings/structures, the owners and/or residents of such structures may be temporarily displaced. These residents/tenants of the affected building structures (109 of them are identified) may be temporarily relocated to allow for project construction to be completed. Furthermore, identified vulnerable persons along the flood control corridors will be considered as project affected persons, and may be required to be temporarily relocated during the construction phase.

#### Mitigation Measures:

Identified health-based or age-based project affected persons shall be temporarily relocated during the construction phase of the project. Such persons shall also be compensated for the inconveniences of the temporary relocation. Temporary relocation shall not exceed 90 days overall in accordance with construction schedule. The relocation period begins to count from the time of contractor mobilization to site after all compensation process is completed.

#### Loss of Economic Trees/Farm Crops

Economic trees/farm crops within the acquired land required for the proposed project may be destroyed.

#### Mitigation Measures:

Owners of damaged economic trees/farm crops shall be compensated based on fair market values.

### **6.4 Identification of Project Affected Population**

Based on the project design, the satellite imagery of the project corridor as shown in Figure 6.2, the field observations and the valuation exercise, the identified project affected assets are summarized in Table 6-2. The existing buildings/structures whose occupants may potentially be impacted are 286. These buildings/structures are shown in Table 6-3. The identified residential or business premises with the associated households (PAHs) and persons (PAPs) that may be temporarily affected by the project activities are summarized in Table 6-3.

A total of 510 project affected persons (PAPs) and 33 vulnerable persons

have been identified. Of the 510 PAPs, there are 154 persons whose land would be affected. One person has economic trees/crops (ETCs) which may be affected by the project activities. The identified PAPs represent owners/residents/tenants of affected land/structures and economic trees and crops located along the channelization corridors. Also included in the PAPs are the identified vulnerable persons living along the project corridors.

**Table 6-2: Summary of Project Affected Assets**

S/No	Project Component	Assets Affected by Project		
		Owners of Buildings/ Structures	Land	Economic Trees/Crops
1	Flood Control Channel Corridor No.1	29	908 m <sup>2</sup>	NA
2	Flood Control Channel Corridor No.2	78	9,153 m <sup>2</sup>	NA
3	Flood Control Channel Corridor No.3	45	5,334 m <sup>2</sup>	NA
4	Flood Control Channel Corridor No.4	109	14,611 m <sup>2</sup>	1
5	Flood Control Channel Corridor No.5	15	NA	NA
6	Flood Control Channel Corridor No.6	10	NA	NA
<b>TOTALS</b>		<b>286</b>	<b>30,006 m<sup>2</sup></b>	

The identification of the project affected population/persons was based on the review of the flood control designs, digital satellite imageries, the proposed road rehabilitation activities, and the field observations by the RAP team along the project corridor. The identified population groups which were considered as targets that may be affected by the different project activities include the following:

- a. Owners of building structures located within the proposed flood control channelization corridors;
- b. Owners of building structures located in areas to be used as construction staging areas during the construction phase of the project;
- c. Residents/tenants of the buildings structures identified in items (a) and (b) above whether the structures are permanent or temporary; residential or commercial;
- d. Owners of land to be acquired for the proposed flood control channelization;
- e. Residents/tenants of buildings structures located within 20m of the flood control channels (whether the structures are permanent or temporary residential or commercial) and who are identified as vulnerable persons; and,
- f. Owners of economic trees/crops located within the flood control channelization corridors.

**Table 6-3: Summary of Project Affected Persons**

Drainage Channel Section	Flood Control Channel Corridor No.1	Flood Control Channel Corridor No.2	Flood Control Channel Corridor No.3	Flood Control Channel Corridor No.4	Flood Control Channel Corridor No.5	Flood Control Channel Corridor No.6
No. of Project Affected Persons	53	119	79	202	36	21

In determining the actual number of project affected assets, households and persons, consideration was given to the potential impacts that may result from the activities of the proposed project bearing in mind the actual distance of the household to the flood control channels and the nature of work to be done in the particular area closest to the household. Specifically, for each building structure where the household lives or carries out daily routine activities, the questions considered relating to potential impacts are:

- Is the asset currently affected by existing drainage channel? If so, has the asset been subsequently restored?
- Is the asset within the proposed flood control channelization corridors?
- Will the asset be impacted by project activities?
- Are persons associated with the asset impacted by project activities?

A “yes” to all the above questions marks the household as a target for potential resettlement, relocation or some form of compensation. Based on the above considerations, the project impact significance and the potential for resettlement was developed. This is summarized in Table 6-3.

**Table 6-4: Summary of Project Impact Significance and Potential Need for Resettlement**

S/No.	Population Group	Identified Project Impact	Impact Significance	Need for Resettlement
1	Owners of building structures located within the proposed flood control channelization corridors;	Potential loss/damage to existing buildings/ structures	Significant	Resettlement/ compensation required
2	Owners of lands located in areas to be used as construction staging areas during the construction phase of the project	Temporary loss of land and/or economic trees/crops	Significant	Compensation required
3	Residents/tenants of the buildings structures identified in items (a) and (b) above whether the structures are permanent or temporary; residential or commercial;	Potential permanent loss of shelter (whether rental or non-rental) and difficulty associated with finding a new place	Significant but reduced to less than significant with mitigation measures	Compensation may be required for temporary land use based on agreement
4	Owners of land to be acquired for the proposed flood control channelization;	Permanent loss of land and/or economic trees/crops	Significant but reduced to less than significant with mitigation measures	Resettlement/ relocation with compensation required for permanent or temporary displacement in accordance with WB Policy
5	Residents/tenants of structures located within 20m of the flood control channels (whether the structures are permanent or temporary; residential or commercial) and who are identified as vulnerable persons;	Vulnerable persons based on age, disability, woman head of household, etc.	Significant but reduced to less than significant with mitigation measures	Vulnerability provisions required as documented in this RAP

S/No.	Population Group	Identified Project Impact	Impact Significance	Need for Resettlement
6	Owners of economic trees/crops located within the flood control channelization corridors	Permanent loss of economic trees/farm crops	Significant	Compensation required

\*\* = "Significance" (Social and Economic) is an objective judgment measure (threshold) about importance of Social impacts on people and communities, and economic impacts on material wellbeing and economic activities (Burdge, 2002; Vanclay, 2002).

### 6.5 Vulnerable Group

Vulnerable group refers to the people who by virtue of gender, age, physical or mental disability, economic disadvantage, or social status may be more adversely affected by resettlement than others and who may be limited in their ability to claim or take advantage of resettlement assistance and related development benefits. There are 510 persons identified as PAPs; 33 of them are considered vulnerable by virtue of physical disability, age and gender/illness. The 33 persons are:

- (1) vulnerable on account of physical disability; and,
- (2) vulnerable on account of age (elderly person over 70 years old)

In addition to the support to be provided for the PAP group, special provision for the vulnerable group will be made to enhance their livelihood through subsistence support. Such support shall be for a period within which the major aspects of the project intervention works ought to have been completed.

**Table 6.3: Summary of Types of Impacts and Compensation Provided**

S/N	Type of Impact	Quantity Impacted	Compensation Amount (Naira)
1	Land	154 persons (30,0067 m <sup>2</sup> .)	N11,202,100.00
2	Economic Trees/Crops	1	N24,000.00
3	Buildings/Structures	286	N27,323,200.00
4	Loss of Income	N/A	N/A
5	Tenants (Temp. Relocation)	86	N5,160,000.00
6	Property Owners (Temp. Reloc.)	23	N1,380,000.00
7	Vulnerable Persons	33	N1,980,000.00 Also to be considered in the state designed livelihood restoration programme

## 7.0 PROPOSED RESETTLEMENT PLAN

### 7.1 Eligibility

The only persons who are considered as qualified for compensation must be pre-identified project affected persons (PAPs). To qualify as PAP, the individual must be identified as a candidate for any of resettlement, relocation, loss of land, loss of building/structure and/or loss of economic trees/crops. Resettlement refers to the involuntary displacement of a person from his/her regular place of residence or business/livelihood/income as a result of demolition of a structure or acquisition of land to allow for project activities. Relocation refers to the involuntary temporary or permanent displacement of a person from his/her regular place of residence or business as a result of an adverse condition/requirement of the project. Vulnerable persons for this project are considered to include women, children and elderly persons, as well as people with disabilities.

Acquisition of land for the project will adversely affect the livelihood of persons, who live, work or earn their living on the land that will be acquired for the project. Only PAPs who registered and met the cut-off date during the baseline survey are considered to be eligible for any form of compensation or assistance. Before the commencement of the project, compensation of PAPs should be completed to avoid household economic difficulties that may result from loss of land and/or economic trees/crops.

#### 7.1.1 Loss of Assets

Compensation will be for assets on the land, as well as other assistance in order to mitigate the adverse consequences that affect people and communities when they give up property for public good. In this project, there are losses of both lands and buildings/structures resulting from the project. The process of mitigating the project impacts on PAPs will involve only cash compensation. This is due to the non-availability of government land for a land-for-land swap as well as the preference of the PAPs for cash payments. There will not be any permanent physical relocation of the PAPs. All persons who are affected regardless of their legal status concerning the affected lands and economic trees/crops are considered eligible for compensation as described in Table 6-3.

#### 7.1.2 Loss of Livelihood

It is noteworthy that only one PAP has grown economic trees and crops within the land required for the project. Consequently, this PAP will be compensated for income from the trees and crops.

### 7.2 Entitlement Matrix

The entitlement list includes persons appropriately defined as follows:-

- Persons who own affected buildings/structures within the flood control channelization corridors;
- Persons who have a right to the needed land;
- Persons who use and cultivate the needed land on any form of arrangements; or
- Persons whose standards of living are adversely affected as a consequence of the project activities.

**Table 7-1: The Entitlement Matrix for Various Identified Categories of PAPs**

Type of Loss	Entitled Person	Description of Entitlement
1. Permanent loss of land	1.1 (a) Legal owners of land	1.1 (a) Land for land compensation is neither practicable nor desirable due to nature of

Type of Loss	Entitled Person	Description of Entitlement
1.1 Cultivable/residential/ commercial land	(b) Occupancy/Hereditary tenant	project. Cash compensation at replacement value based on market rate plus 10% compulsory acquisition surcharge as second option (b) Compensation will be paid as a one-time lump sum grant for restoration of livelihood and assistance for relocation. .
2. Damage to land (such as abutting sub-project site) 2.1. By excavation from borrows for earth for construction use. 2.2 By severance of agricultural holding	2.1. (a) Legal owner/s (b) Village/s or clan/s with customary ownership 2.2. No project impact is envisaged	2.1 (a) & (b) Restoration of land to pre-construction condition or cash compensation at prevailing rates for necessary bulldozer/ tractor hours to restoring level and/or truckloads of earth for fill
3. Loss of income and livelihood 3.1. Temporary loss of access to land for cultivation	3.1 Cultivator occupying land	3.1. Estimated net income for each lost cropping season, based on land record averages of crops and area planted in the previous four years
3.2. Loss of agricultural crops, and fruit and wood trees.  3.3 Loss of income by agricultural tenants because of loss of land they were cultivating	3.2 (a) Owner/s of crops or trees. Includes crops/trees owned by encroachers/squatters (b) Tenant  3.3 Persons working on the affected lands	3.2 (a) Cash compensation for loss of agricultural crops at current market value of mature crops, based on average production. Compensation for loss of fruit trees for average fruit production years to be computed at current market value.  Compensation for loss of wood-trees at current market value of wood (timber or firewood, as the case may be). 3.2 (b) Partial compensation to tenants for loss of their crops/trees as per due share or agreement (verbal or written) 3.3 One-time lump sum grant to agricultural tenants (permanent, short-term or long-term agricultural labor (this will be in addition to their shares in crop/tree compensation) <b>a) Tree/perennial crops:</b> Harvesting of the crops will be given a first priority but where harvesting is not possible, counting of the affected crops will be done in the presence of the owner. Computation of the costs will be done according to market rates <b>b) Annual crops:</b> Crops will be harvested by the owner and therefore no compensation will be paid for crops. Where crops cannot be harvested, compensation at the market rate will be paid
4. Permanent loss of Structures 4.1 Residential and commercial structures	4.1. Project impact is identified or envisaged for 155 properties.	4.1 Compensation for loss of building/structure will be at replacement value
4.2. Cultural, Religious, and community structures /facilities School, church, water channels, pathways, and other community	4.2. Persons officially responsible for the up keep of the identified facility	Compensation will be paid as a one-time lump sum grant for restoration of livelihood and assistance for relocation.

Type of Loss	Entitled Person	Description of Entitlement
structures/installations		
5. Special provision for vulnerable APs 5.1.Re-establishing and/or enhancing livelihood	5.1 Women headed households, disabled or elderly persons and the landless	5. Needs-based special assistance to be provided either in cash or in kind.
5.2 Change in Livelihood for women and other vulnerable APs that need to substitute their income because of adverse impact	5.2. (a) Vulnerable APs, particularly Women enrolled in a vocational training facility 5.2. (b) owner/s whose landholding has been reduced to less than 5 acres	5.2 (a) & (b).Restoration of livelihood (vocational training) and subsistence allowance at agreed rate per day for a total of 6 months while enrolled in a vocational training facility
Unanticipated adverse impact due to project intervention or associated activity	The Project team will deal with any unanticipated consequences of the Project during and after project implementation in the light and spirit of the principle of the entitlement matrix.	

### 7.3 Valuation Procedures

The valuation process adopted in developing this RAP complies with the Laws of Nigeria and the World Bank guidelines. The applicable elements of this process are as contained in the “Description of Entitlement” column of Table 7.1 and the general outcomes are summarized in Table 7-2.

For land without structure, the replacement cost is considered as the market value of land of equal size and use, in the vicinity of the affected land with similar or improved public facilities and services, plus any associated governmental fees. For agricultural land, the replacement cost is considered as the market value of land of equal productive potential or use located in the vicinity of the affected land, plus the cost of land preparations and any associated governmental fees. In determining the replacement costs, depreciation of the asset and the value of salvage materials are not taken into account, nor is the value of benefits to be derived from the project deducted from the valuation of an affected asset.

**Table 7.2: Summary of RAP Valuation Process**

ASSET	PROCESS	RECOMMENDATIONS
Land with Structures	<b>Steps:</b> There are 286 structures identified that will be affected by the project. Compensation for structures is therefore expected.	a) The required land without structures needed for project is approximately about 30,006 m <sup>2</sup> .
Land without structures	a) Inventory: As part of the RAP, the names and contact details of all persons affected by the project have been documented. b) Compensation: The RAP data sheet spells out how each person is affected and indicates how much compensation will be paid for crops and trees lost. c) Payment: The project requires about 30,006 m <sup>2</sup> of privately owned land without structures to be acquired. Delta NEWMAP/DTSG is therefore expected to	b) Delta NEWMAP/DTSG will pay compensation for land without structures acquired for project in accordance with the WB and Nigerian land Policies.  c) Delta NEWMAP/MOE will

ASSET	PROCESS	RECOMMENDATIONS	
	compensate the PAPs on Land.		
Lost business profits and employee earnings	The Jesse Community is essentially a mix of commercial and farming community. Permanent loss of their land implies permanent loss of the business outlets or their means of livelihood. Compensations for business profit losses or earnings are expected.	provide transportation for the PAPs that will be temporarily relocated during construction works and back to their residences after completion of works. Cash compensation in lieu of transportation could also be made to the affected persons.	
Crops/Trees on the fields cultivated by those affected	Economic Trees/Crops: Harvesting of the crops by the owners will be given a first priority. However, to assure safety of the people such trees/crops shall be considered lost to the project. Consequently, compensation will be paid to owners for their trees/crops. Computation of the costs is done according to prevailing market rates		d) The owners of economic trees/crops on acquired lands will be entitled to safely remove any crops they wish to salvage within one week of notification to do so.
Vulnerable persons on account of age, incapacitation, widowhood and other induced social conditions	a) Inventory: The names and contact details of all vulnerable persons have been documented as part of this RAP. b) Compensation: The RAP data sheet spells out how each person is affected and indicates how much compensation will be paid and for what periods of time. c) Payment: The Delta NEWMAP/DTSG is therefore expected to pay the relocation costs of these PAPs and also provide the transportation means of moving these persons to the new locations and back to their homes when the risk elements have been completely removed.		e) Notwithstanding the provisions in item (d) above, owners of affected economic trees/crops will be entitled to compensation for those trees/crops within acquired land for project. Compensation will be at the prevailing market rates and as outlined in Table 7-1.

#### **7.4 Compensation for Losses and Other Assistance**

Cash compensation is adopted as the mitigation measure for the needed land and the economic trees/crops which will be affected. Necessary assistance will also be provided to PAPs who are vulnerable on account of exposures to potential adverse social conditions arising from the project.

To qualify as project affected person (PAP), the individual must be identified as a candidate for any of the following: resettlement, relocation, loss of land, and/or loss of economic trees/crops. Resettlement refers to the involuntary displacement of a person from his/her regular place of residence or business as a result of demolition of a structure to allow for project activities. Relocation refers to the involuntary temporary displacement of a person from his/her regular place of residence or business as a result of an adverse environmental and/or human health condition to allow for project activities. These displacements shall require some compensation in accordance with the provisions of WB OP 4.12 and other statutory requirements.

Vulnerable persons for this project are considered to include women, children, persons with disabilities and elderly people suffering from illness. Only PAPs who registered and met the cut-off date during the baseline survey are considered to be eligible for any form of compensation or assistance.

#### **7.4.1 Resettlement Measures**

There are no permanent relocations identified for this project since no buildings/structures whether residential or commercial will be wholly damaged by the project. However, temporary relocations are expected for this project.

#### **7.4.2 Compensation for Land Losses**

The total land size estimated for acquisition is approximately 30,006 m<sup>2</sup>. This is calculated as the sum of the individual areas of land to be acquired from the PAPs as a part of the required land for flood control channels. Full compensation at the prevailing market rates shall be applied for the land acquisition.

The WB Policy OP4.12 requires that appropriate compensation be paid to involuntarily displaced persons to a level that improves or at least restores their income and living standards after displacement. In accordance with this policy, all persons whose lands shall be acquired for the project shall be compensated according to the Entitlement Matrix for various categories of PAPs (Table 7-1).

#### **7.4.3 Compensation for Relocations**

PAPs are identified in this RAP for temporary relocation resulting from activities of the project. These PAPs shall receive appropriate compensations for relocation and associated inconveniences.

#### **7.4.4 Compensation for Loss of Economic Trees/crops**

Harvesting of the crops by the owners will be given a first priority. However, to assure safety of the people, such trees/crops shall be considered lost to the project. Consequently, compensations are to be paid to owners for their trees/crops. Compensation was based on the provisions in Table 7.1.

#### **7.5 RAP Implementation Committee (RIC)**

The NEWMAP SPMU has established an implementation/resettlement committee to coordinate and facilitate the Jesse RAP implementation. The function of this committee shall include:

- To hold meetings with PAPs, site committee and community associations on the processes for carrying out resettlement and compensation;
- Engage with stakeholders and ensure successful land acquisition, residential construction and assistances required for livelihood restoration of PAPs according to the entitlement listed in this RAP report;
- Provide assistances required for livelihood restoration of PAPs according to the entitlement listed in this RAP report;
- Implement, monitor and review the progress of the implementation of the RAP and,
- Carry out post implementation audit and reporting.

The composition of this committee shall include:

- Representative of the PAPs;
- Representative of the Site Committee;
- Representative of Community Association;
- Representative of the Ministry of Environment;
- Representative of Focal NGO;
- Social and Livelihood Officer from the SPMU; and,

- Project Accountant from the PMU

The Committee shall be headed by the Representative from the Ministry of Environment while the Social and Livelihood Officer shall be the Secretary to the committee.

### **7.6 Compensation Procedures**

The compensation process and procedure shall be as set out by the RAP Implementation Committee (RIC) under the supervision of the NEWMAP SPMU and the FPMU Social/livelihood Officer. The RIC will verify the affected households against the list of eligible persons enumerated at the cut-off date to ensure that the correct compensation amount is paid to eligible persons. The RIC will acknowledge the compensation offers in addition to acknowledgement of receipt of compensation by the PAPs.

Copies of the respective identity cards of all identified PAPs were provided as part of the PAP Census exercise and should be used to identify the PAPs to be compensated. These identity cards are now on record.

#### **7.6.1 Relocation Times**

The PAPs to be temporarily relocated will be given a relocation time of at least two weeks and will be assisted in the process. This process and timing will be properly chosen to minimize transfer disturbances.

#### **7.6.2 Livelihood Restoration**

The main objective of the RAP is to develop programmes that aim to improve the livelihoods of PAPs or restore them to the pre-displacement levels. In this project, the impact on land with economic trees/crops is such that sustainability of livelihoods will be affected. Cash-for-land compensation is adopted because state land is not available for compensation. This will apply to people who are not necessarily physically displaced but are affected by a land loss.

Other factors considered in relation to livelihood restoration include:

- Development of capacity building programmes to train PAPs and other community members on self-employment skills and enterprise development
- Development of programmes for provision of assistance to the entire community in areas requiring development of soil erosion prevention and control programmes, sustainable watershed management and environmental sustainability programmes.
- Adequate compensation to all the PAPs for lost assets, relocation inconveniences and income lost

## **8.0 DISPUTE RESOLUTION AND GRIEVANCE REDRESS PROCEDURE**

### **8.1 Dispute Resolution**

It is for the benefit of the State, the project and the PAPs to devise a mechanism through which complaints and disagreements can be smoothly resolved. All disputes arising from implementation of this RAP shall be handled by the Grievance Redress Committee (GRC) which will take all necessary steps to ensure speedy and effective resolution of any disputes. Currently, there is a series of customary avenues that exist to deal with dispute resolution in the community and they will be employed as the “court of first appeal”, where relevant. The resettlement and compensation process will ensure that, if necessary, corrective action is taken expeditiously. Such mechanisms are fundamental to achieving transparency in the resettlement process.

The GRC will be housed within the community and will document and facilitate the dispute resolution process, ensure effective and timely resolution thereby reducing the risk of escalation of conflicts and avoiding unnecessary delays. If and where necessary, the community Traditional Leadership shall be asked to provide recommendations as to how an issue is to be addressed. The Committee shall ensure careful documentation of grievances and remedial actions to enhance accountability and to reduce liability.

### **8.2 Dispute Over Land Matters**

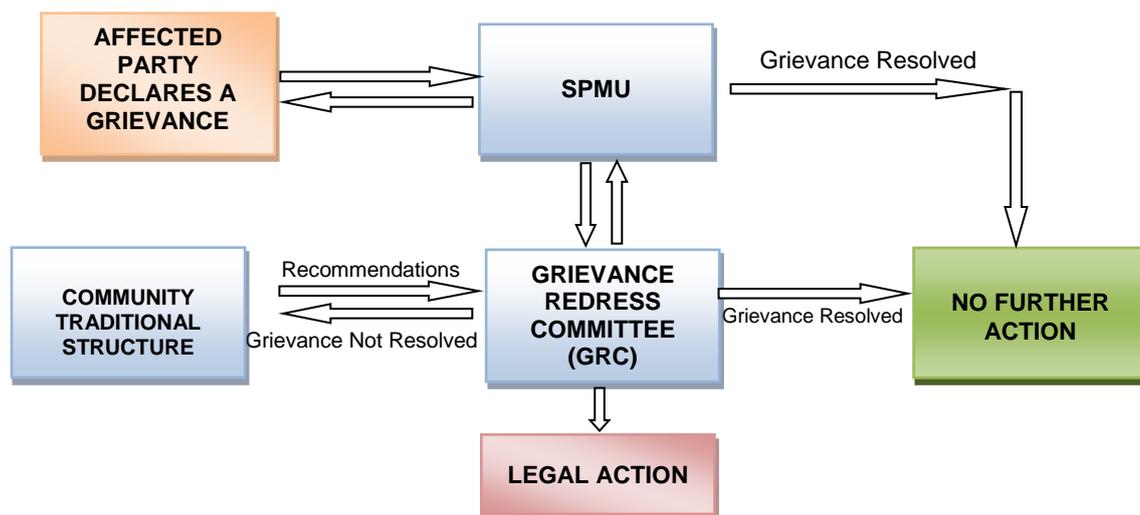

The GRC shall ensure that any disputes arising from land matters are amicably resolved. During the community consultation process of this RAP, it was understood from the community that there are established traditional mechanism by which land ownership disputes are resolved. The GRC may adopt this mechanism if considered effective and timely. This mechanism borders on the community’s historical knowledge of every family within each village and the family’s ancestral land heritage. Consequently, all land ownership disputes are normally resolved along the lines of known family heritage and the well-established and entrenched traditional norms. In the event of multiple land ownership disputes, the matter should be referred to the Community Traditional Leadership which will facilitate a speedy resolution of the matter.

### **8.3 Grievance Redress Mechanisms**

Grievance redress mechanisms (GRM) are essential tools for allowing affected persons to express their concerns about the resettlement and compensation process as they may arise and, if necessary, for corrective action to be taken expeditiously. Jesse community has its traditional land dispute resolution system that hinges on historical knowledge of family descendants. The grievance framework recommended for this RAP is built on the already existing structures as well as the grievance redress committee (GRC) and the NEWMAP grievance redress framework approved by the World Bank. The recommended land system together with the WB-approved grievance redress committee framework is depicted in the Grievance Redress Procedure shown in Figure 8.1.

If negotiated settlement of grievances cannot be achieved through the normal procedural steps outlined in the mechanism of the committee, the complainant has the right to approach the court. A detailed information booklet on the GRM procedure will be included in the community engagement plan to ensure that all PAPs know and understand the process and are able to access it whenever they feel the need. The effectiveness of the GRM will be one of the crucial monitoring indicators.

**Figure 8.1:** Grievance Redress Procedure

#### 8.4 Formation of Grievance Redress Committee (GRC)

The objective of the GRC is to respond to the complaints of the PAPs in a timely and transparent manner and to provide a mechanism to mediate conflict and cut down on lengthy litigation, which often delays projects. It will also provide people who might have objections or concerns about their assistance a public forum to raise their objections and through conflict resolution, address these issues adequately. The committee will provide ample opportunity to redress complaints informally, in addition to the existing formal administrative and legal procedures.

The major grievances that might require mitigation include:

- PAPs not listed;
- Losses not identified correctly;
- Inadequate assistance;
- Dispute about ownership;
- Delay in disbursement of assistance and improper distribution of assistance.

The NEWMAP SPMU has established a Grievance Redress Committee (GRC) overseen by NEWMAP to address complaints from this RAP implementation. The GRC shall provide specific necessary support and resolution of the potential PAP related grievances in accordance with provisions of this RAP. The Committee will be coordinated as provided for at each level and the compositions of each level of the GRC comprises as follows:

#### **FIRST LEVEL: COMMUNITY GRIEVANCE REDRESS COMMITTEE (COM-GRC)**

The first stage of the GRC shall grievance process shall be the community-based GRC (Community GRC) which shall be coordinated by the Focal NGO (FNGO) and shall be made up of the following:

- 1 Representative from each of the Community Associations
- 1 Representative from the traditional ruler of the Community
- 1 Representative of the Local Government Area
- 1 Representative of Ministry of Lands, Survey and Physical Planning.
- 1 Representative of the Project Affected Persons (PAPs)
- Social and Livelihood Officer in SPMU as the Secretary
- 1 Representative from the Focal NGO as coordinator

This committee shall be the place of first recourse for anyone who has a grievance matter related to the site. The timeline for addressing/resolving the issues raised by a complainant by this GRC shall be at most 15 days from the last day allowable for grievance and complaints submission following the end of RAP disclosure.

### **SECOND LEVEL: PMU GRIEVANCE REDRESS COMMITTEE (PMU-GRC)**

Where the Com-GRC is unable to resolve the matter, the Complainant may seek redress from the Project Management Unit – Grievance Redress Committee (PMU-GRC). This Committee shall be coordinated by the Project Coordinator of the SPMU and made up of the following:

- 1 Representative from the department of Flood and Erosion Control in the Ministry of Environment
- 1 Representative from the Ministry of Lands and Survey
- 1 Representative of the Project Affected Persons (PAPs)
- 1 Representative from the Focal NGO
- Social and Livelihood Officer in SPMU as the Secretary
- Project Accountant in the SPMU
- Project Coordinator of the SPMU as the Coordinator

This committee shall be the second place of recourse for anyone who has a grievance matter related to the site. The timeline for addressing/resolution of the issues raised by a complainant by this PMU-GRC shall be at most 15 days from the last day allowable for grievance and complaints submission following the inability of the Com-GRC to resolve the matter.

### **THIRD LEVEL: NEWMAP STEERING/TECHNICAL COMMITTEE (STATE-GRC)**

Where the PMU-GRC is unable to resolve the matter at this level, the Complainant may seek redress from the NEWMAP Steering and Technical Committee GRC (STATE-GRC). This Committee will be coordinated by the Chairman of the Steering Committee, who is the Honourable Commissioner of the Ministry of Environment. The timeline for addressing/resolving Issues raised by a complainant by this Committee shall be at most 15 days from the last day allowable for grievance and complaints submission following the inability of the PMU-GRC to resolve the matter. The composition of this Committee shall be as follows:

- The Federal Social and Livelihoods Specialist
- Representative of the Umbrella NGO
- Social and Livelihood Officers from 2 neighboring NEWMAP states

- who have experience in handling grievance matters  
Project Coordinator of the SPMU as the Secretary

The timeline for addressing/resolving issues raised by a complainant by this STATE-GRC shall be at most 15 days from the last day allowable for grievance and complaints submission following the inability of the PMU- GRC to resolve the matter.

#### **FOURTH LEVEL: THE COURTS**

Where the Complainant is not satisfied with the decisions of the STATE-GRC, he/she may seek redress in the law Courts.

All grievances will first of all be address at the First Level. It will only move on to Second Level if the first level agreement was not accepted by the party involved and then to third and forth under similar situations. If negotiated settlement of grievances cannot be achieved through the normal procedural steps outlined in the grievance mechanism, the complainant has the right to approach the courts. The GRM procedure will be included in the community engagement plan to ensure that all PAPs know and understand the process and are able to access it whenever they feel the need. The effectiveness of the GRM will be one of the crucial monitoring indicators.

#### **8.5 Training of the Grievance Redress Committees**

The various Grievance Redress Committees shall be provided with training to enable them adequately perform their responsibilities. The training shall be organized by the SPMU who shall provide logistics such as: writing materials, per diem, transportation, training venue and time.

The details of the training including time and date shall be adequately communicated to all members for their attendance. At the end of the training, members of the intervention community shall be adequately sensitized on the procedure for submission of complaints and grievances.

## **9.0 MONITORING AND EVALUATION (M & E)**

One of the potential risks associated with displacement and resettlement is the subtle break up of social cohesion resulting from inordinate and inappropriate spending of compensation money by the head of households to the detriment of other members of the household. It is necessary that the Safeguard Officers of the SPMU through the appointed focal NGO carry out independent monitoring and evaluation to strengthen implementation consistency and follow-up of the whole project process. The FNGO will work in consultation with the SPMU and the RIC and report regularly to the SPMU and DTSG.

Through the RAP community consultation process, effective framework has already been established with the local community. This provides an objective sounding board for the PAPs to relate concerns to the SPMU staffers or their appointed M & E Agent(s). The M & E officers will also work closely with the appropriate community organizations, such as the local churches to continuously identify and evaluate any problems and difficulties that may occur after the process of implementation. The SPMU and the M & E officers will also pay special attention to the vulnerable groups, such as the aged and women headed families.

Monitoring will focus on:

- Information about PAPs post compensation and entitlement spending;
- Relevance of relocation and RAP implementation timetable to overall project effectiveness;
- Content of grievances, efficiency of procedures and accountability in handling the grievance;
- Use of compensation money for those who invested it in profit-making enterprises; and
- Site conditions and progress in the post construction activities at the site.

### **9.1 Performance Indicators**

Monitoring and evaluation will be carried out focusing on the following key performance indicators:

**Table 9.1: Monitoring and Performance Indicators**

<b>Monitoring Aspects</b>	<b>Potential Performance Indicators</b>
Institutional set-up and resource allocation	<ul style="list-style-type: none"> <li>• RAP implementation and monitoring institutional set-up is in place.</li> <li>• Budgeted RAP costs released and placed at disposal of RAP implementation entities.</li> <li>• Grievance redress mechanism established and explained to the PAPs and affected communities.</li> <li>• Coordination initiative implemented and PAPs committees notified for continued consultations and participation of PAPs in RAP implementation and monitoring.</li> </ul>
Delivery of Entitlements	<ul style="list-style-type: none"> <li>• Compensation entitlements disbursed, compared with number and category of losses set out in the entitlement matrix.</li> <li>• Relocation and rehabilitation costs and income restoration support provided as per entitlements and schedule.</li> <li>• Social infrastructure and services restored as and where required.</li> </ul>

	<ul style="list-style-type: none"> <li>• Entitlements against lost business including transitional support to reestablish enterprises delivered.</li> <li>• Income and livelihood restoration activities being implemented as set out in the income restoration plan.</li> </ul>
Restoration of living standard and income	<ul style="list-style-type: none"> <li>• Affected residential structures reconstructed/restored along the intervention corridors and at relocation sites outside intervention limits.</li> <li>• Impacted business structures (shops/stalls) constructed/relocated outside construction limits and business/income activity restored.</li> <li>• Number and percentage of displaced persons covered under livelihood restoration and rehabilitation programs (women, men, and vulnerable groups).</li> <li>• Number of displaced persons who have restored their income and livelihood patterns (women, men, and vulnerable groups).</li> <li>• No of PAPs (especially vulnerable) provided opportunities in project related employment.</li> </ul>
Consultation and Grievances	<ul style="list-style-type: none"> <li>• Consultations organized as scheduled including meetings, groups, and community activities.</li> <li>• RAP disclosure and information dissemination activities implemented and knowledge of entitlements by the displaced persons.</li> <li>• Community awareness about grievance redresses mechanism and its use.</li> <li>• Progress on grievances recorded and resolved including information dissemination to PAPs on the resolution of the grievances.</li> <li>• Information on implementation of special measures for vulnerable groups</li> </ul>
Communications and Participation	<ul style="list-style-type: none"> <li>• Number of meetings held with PAPs (male and female) to explain RAP provisions, grievance redress mechanism and compensation disbursement mechanism.</li> <li>• Assessment about Level of information communicated—adequate or inadequate.</li> <li>• Number of PAPs (male &amp; female) participated in the meetings.</li> <li>• Number of meetings and consultations held with vulnerable people with number of participants and level of information communicated.</li> </ul>
Benefit Monitoring	<ul style="list-style-type: none"> <li>• Noticeable changes in patterns of occupation, production, and resource use compared to the pre-project situation.</li> <li>• Noticeable changes in income and expenditure patterns compared to the pre-project situation.</li> <li>• Changes in cost of living compared to the pre-project situation</li> <li>• Changes in key social and cultural parameters relating to living standards</li> <li>• Changes occurred for vulnerable groups benefiting from the project.</li> </ul>

## **9.2 Completion Audit**

SPMU shall commission an external party to undertake an evaluation of RAP's physical inputs to ensure and assess whether the outcome of RAP complies with the involuntary resettlement policy of the World Bank. The completion audit shall be undertaken after RAP inputs. The audit shall verify that all physical inputs committed in the RAP have been delivered and all services provided. It shall evaluate whether the mitigation measures prescribed in the RAP have the desired effect. The completion audit should bring to closure SPMU's liability for resettlement.

## 10.0 ESTIMATED COST OF RAP

The overall cost for compensation and resettlement for land, economic trees/crops and temporary relocations under this RAP, including cost for, administration, monitoring and evaluation is **N56,593,110.00** (Fifty Six Million, Five Hundred and Ninety Three Thousand One Hundred and Ten Naira) only. A breakdown of the compensation and resettlement costs is shown Table 10-1.

The underlying assumptions, consistent with the WB resettlement Policy framework (RPF) developed for NEWMAP sub-projects, upon which the RAP costs were developed are included in Table 10-2. Details of the cost estimates are shown in Table 10-3.

**Table 10-1: Compensation and Resettlement Cost**

NO	ITEM (BREAK DOWN AND DETAIL AS APPROPRIATE)	NIGERIA NAIRA	US DOLLARS	%
A	COMPENSATION			
A1	LAND ACQUISITION (30,006m2)	11,202,100.00		
A2	DESTRUCTION AND DAMAGES TO CROP	24,000.00		
A3	DAMAGE TO STRUCTURES	27,323,200.00		
A4	COMMUNITY INFRASTRUCTURE			
A5	RELOCATION/DISTURBANCE ALLOWANCE	6,540,000.00		
A6	CONTINGENCIES-OTHER COMPENSATION			
	<b>TOTAL COMPENSATION</b>	<b>45,089,300.00</b>		<b>79.31%</b>
B	RESETTLEMENT			
B1	RESETTLEMENT LAND PURCHASE			
B2	RESETTLEMENT LAND DEVELOPMENT			
B3	HOUSING CONSTRUCTION			
	<b>TOTAL RESETTLEMENT</b>	<b>0</b>		<b>0.00%</b>
C	ADDITIONAL MITIGATION			
C1	VULNERABLE GROUPS	1,980,000.00		
C2	LIVELIHOOD RESTORATION MEASURES	Provided through CIG		
C3	COORDINATION OF ADDITIONAL MITIGATIONS			
C4	GRIEVANCE MANAGEMENT	1,000,000.00		
	<b>TOTAL ADDITIONAL MITIGATIONS</b>	<b>2,980,000.00</b>		<b>5.24%</b>
D	IMPLEMENTATION COSTS			
D1	ASSET VALUATION	1,678,900.00		
D2	IMPLEMENTATION LOGISTICS	1,500,000.00		
D3	EXTERNAL MONITORING	500,000.00		
D4	CAPACITY BUILDING	1,550,000.00		
D5	END-OF-PROJECT AUDIT	600,000.00		
	<b>TOTAL IMPLEMENTATION</b>	<b>5,828,900.00</b>		<b>10.69%</b>
E	CONTINGENCIES (5%)	2,689,910.00		4.76%
	<b>GRAND TOTAL</b>	<b>56,593,110.00</b>		<b>100%</b>

**Table 10-2: Underlying Assumptions for Cost Estimation**

S/N	ITEM	COST (NAIRA)	ASSUMPTIONS
1	Compensation for land acquisition	Per hectare	For land acquisition purposes, based on cost realized in projects involving similar issues in Nigeria
2	Compensation for loss of crops	Per hectare of farm lost	Include cost of labor invested and average of highest price of staple food
3	Compensation for buildings and structures	N/A	N/A
4	Cost of relocation assistance income	N/A	N/A
5	Cost of restoration of individual livelihood/income	Per individual	This cost is to provide livelihood/income restoration
5	Cost of vulnerability support	Per individual	This cost is to provide additional support to vulnerable persons
6	Cost of training	Per participant	Depends on the number of stakeholders selected for training
7	Cost of management	Per sub-project site	Incurred by MDA stakeholders such as ministries and local agents
8	Cost of monitoring and evaluation	Per sub-project site	Dependent on the each sub-project site
9	TOTAL	Per sub-project site	Addition of all cost incurred
10	Contingency	Per total cost	5% of the total cost
11	GRAND TOTAL	N/A	Sum of the total and contingency cost

**Table 10-3: Breakdown of Cost Estimates**

S/NO	ITEM	DESCRIPTION	UNIT	QTY	RATE	TOTAL COMPENSATION COST
1	Buildings/Structures	Compensation for damage to varied structures (286 persons)	LS	1	27,323,200.00	27,323,200.00
2	Relocation/ Disturbance	Compensation for temporary inconvenience (disturbance) during project construction phase (109 persons)	No	109	60,000.00	6,540,000.00
3	Land Acquisition	Compensation for land acquisition (154 persons)	M <sup>2</sup>	32,006	350.00	11,202,100.00
4	Economic trees/crops	Destruction and damages to economic trees/crops (1 person)	LS	1	24,000.00	24,000.00
5	Vulnerable group considerations	Compensation for vulnerability (6mos maximum)	No	33	60,000	1,980,000.00
6	Livelihood restoration considerations	Livelihood/income restoration measures	Provided through CIG			
7	Capacity building for skill development	Preparatory resettlement forums and awareness to affected persons	LS	1	500,000	500,000.00
		Trainings on enterprise development	LS	1	500,000	500,000.00
		Trainings on community project participation and sustainable management	LS	1	550,000	550,000.00
8	Professional services	Asset Valuation	LS	1	1,678,900.00	1,678,900.00
		Implementation Logistics	LS	1	1,500,000.00	1,500,000.00
		Grievance Management	LS	1	1,000,000.00	1,000,000.00
		External Monitoring	LS	1	500,000.00	500,000.00
		End of project audit cost	LS	1	600,000.00	600,000.00
Sub-total						53,898,200.00
9	Contingency		%	5		2,694,910.00
<b>GRAND TOTAL</b>						<b>56,593,110.00</b>

## 11.0 IMPLEMENTATION SCHEDULE

The implementation and management of the RAP schedule should be designed to facilitate necessary compensation of PAPs. The RAP activities also need to be implemented within an agreed timeframe and budget. Appropriate timing should be adhered to in order to avoid false claimants for compensation especially if the situation arises where site clearing is to begin before the resettlement end date.

The RAP activities will be executed in accordance with the schedule shown in Table 11-1 below. The period of the first week will be used to develop and set up all structures necessary to support all aspects of the programmes.

**Table 11-1: Implementation Schedule – Development Phase**

DESCRIPTION OF ACTIVITY	DURATION IN MONTHS			
	1 <sup>st</sup> Month	2 <sup>nd</sup> Month	3 <sup>rd</sup> Month	4 <sup>th</sup> Month
Disclosure of RAP Report				
Formation of Project Grievance Redress Committee (GRC)				
Formation of RAP Implementation Committee (RIC)				
Identification of Contractor				
Hold Stakeholders Meetings and Consultations				
Listen to Grievances/ Complaints and Address Them				
Execute Capacity Building Programmes				
Compensate All PAPs				
Supervision of RAP Implementation				
Monitoring & Reporting on RAP Implementation				
Programme Administration				

*ANNEXURE I: Socioeconomic/Census Data Forms***JESSE FLOOD INTERVENTION PROJECT****DATA COLLECTION CONSENT FORM**

<b>Questionnaire Number</b>	
-----------------------------	--

**CONSENT:**

We are conducting a Resettlement Action Plan for Delta State Project Management Unit (SPMU) of Nigeria Erosion and Watershed Management Project (NEWMAP) under the Ministry of Environment, Delta State to determine the persons and assets that will be affected by the Jesse flood control project. Your consent for this assessment is required.

Respondent Phone

Number(s): \_\_\_\_\_

<b>Name of Property Owner</b>

ANNEXURE

**JESSE FLOOD INTERVENTION PROJECT  
SOCIO-ECONOMIC BASELINE SURVEY  
GENERAL INFORMATION**

Name of Interviewer.....Date.....

...  
Name of Village/Town and Address.....

What is likely to be affected by the project?.....  
Structure-1; Land-2; Structure and Land-3; Cash Crop-4; Others-5  
(specify).....

HEAD OF HOUSEHOLD (H.H).....Years of Occupation of Affected Property.....Years

NAME OF RESPONDENT: ..... RELATIONSHIP TO THE H.H.....

STATUS OF USER OF PROPERTY: A) Title holder; B) Tenant; C) Non-Title Holder; D) Trust; E) Govt; F) NGO; G) Squatter

**AFFECTED PROPERTY INFORMATION**

**Affected Structure Details:**

Type of Use	Property User Status	Monthly Rent	Utility Connections	Distance to Gully Edge (m)	No of Rooms	Floor Level	Total Area (m2)	Type of Construction		
								Roof	Wall	Floor

**Type of Use** = Residence-1; Commercial-2; Residential-cum-Commercial-3; Animal Shed/Poultry-4; Other (specify)-5.....

**User Status** = Own-1, Rent-2, Caretaker-3, Squatter-4, Encroachers-5, Other (specify)-6.....

**Type of Construction: Wall** = Mud-1, Thatched-2, Brick-3, Plank-4, Zinc-5  
Thatched-3; Tiles-4

**Roof** = Zinc/Asbestos-1; RCC-2;

**Floor** = Cement-1; Mud-2; Tiles-3    **Floor Level** = Bungalow-1, Storey Building-2  
Water-2; Phone-3

**Utility Connection** = Electricity-1;

## AFFECTED LAND DETAILS

SIZE OF AFFECTED LAND.....

TYPE OF LAND..... Agriculture-1; Residential-2; Commercial-3; Barren-4; Grazing Land-5

If Agriculture, is land ..... Wet-1; Dry-2; Other-3

What are the crops grown on land?.....

What are other immovable assets likely to be affected: Trees.....; Orange.....; Mango.....; Apple.....; Other.....

In your view, what is the yearly monetary benefit you gain from lost land?....N.....

## HOUSEHOLD INFORMATION

### Household Composition and Personal Information

Household Members	Surname	Other Names	Relationship With H.H	Gender	Age	Disability	Marital Status	Educational Level	Occupation
HH									
Spouse									
Member 1									
Member 2									
Member 3									
Member 4									
Member 5									
Member 6									
Member 7									

Disability = Blind-1; Crippled-2; Mentally Disabled-3; Physically Challenged-4, Other-5

Relationship = Self -1; Wife-2; Son/Daughter-3, Nephew/Niece-4, Son-in-law/Daughter-in-law-5, Grand Child-6, Parent-7, House Help-8, Others-9

Marital Status = Single-1, Married-2, Widow-3, Widower-4, Divorcee-5, Separated-6, Single Parent-7.

Literacy Level = Illiterate-1, Primary School-2, Secondary School-3, Undergraduate-4, Graduate-5, Post Graduate-6, Others-7.

Occupation = Crop Farming-1, Animal Husbandry-2, Service Provider-3, Civil Servant-4, Craftsmanship/Artisanship-5, Trade/Business-6, Industrial Worker-7, Daily Wage Labour-8, Other-9.

**Household Income from Various Sources during Last One Year (Naira):**

<b>Agriculture</b>		<b>Industry</b>	
<b>Dairy</b>		<b>Goatery</b>	
<b>Business</b>		<b>Sheep Rearing</b>	
<b>Service</b>		<b>Others (specify)</b>	
<b>Others (specify)</b>		<b>Others (specify)</b>	
<b>Others (specify)</b>		<b>Others (specify)</b>	

**INFORMATION OTHER THAN AFFECTED PROPERTIES**

**Assets Ownership – Immovable Assets (other than the affected ones):**

	<b>Description</b>	<b>Unit</b>
A	Total area of immovable property owned by the Head of Household (acre)	
B	Built up area used for dwelling/shop (sq m)	
C	Area used for agricultural production, if any (acre)	
D	Area used for grazing (acre)	
E	Area under backyard production	
F	Area under tree	
G	Other (specify)	
H	Other (specify)	

**Assets Ownership (Please Record Numbers)**

TV	Fridge	Radio	Vehicles				Cooker	Any Other (specify)	Any Other (specify)	Any Other (specify)	Any Other (specify)
			Bus/Truck	Cars	Motor cycle	Keke Napep					

**Live Stock Assets (Please Record Numbers)**

<b>Classification</b>	Cows	Goats	Poultry	Sheep	Others	Others	Others
<b>Give Number</b>							

**Household Health Status**

Was any member of your family affected by any major illness in the past one year? Yes-1; No-2

If YES, Indicate the details:

S/No.	Type of Disease/Illness	No. of Cases	Treatment Taken		Type of Treatment	Distance Travelled for
			Yes	No		

					Preferred	Treatment

**PROJECT RELATED**

Are you aware of the proposed gully intervention project? Yes-1; No-2  
 If yes, what is the source?..... TV-1; Newspaper-2; Govt Official-3; Friend/Relative-4; Other-5

What is your opinion about the project?..... Good-1; Bad-2; Can't Say-3  
 If good, what positive impacts do you perceive (can have multiple choice)? 1- Increase in employment opportunity; 2- Emotional relief  
 3- Increase in land price; 4- More value for local product; 5- Better infrastructure facility; 6- Increase in business opportunity.

If bad, what negative impacts do you perceive (can have multiple choice)? 1- Loss of land and income opportunity;  
 2- Pressure on existing infrastructure; 3- Influx of population; 4- Conflict with outsiders; 5- Increase in antisocial elements

## **RESETTLEMENT AND REHABILITATION OPTIONS OF THE PAPs**

Are you willing to resettle voluntarily?..... Yes-1; No-2

### **(Residence getting displaced)**

- i) How far do you prefer to be relocated? 1- Within the village or town; 2- Outside the village/town
- ii) If outside the village/town, kindly give the name of the other place.....
- iii) How far is this place from the present location?.....
- iv) What is your preferred rehabilitation measure? (only one choice):
  - Replacement value & Rehabilitation grant
  - Plot on cost basis, Replacement value and Rehabilitation grant
  - Free plot and construction allowance (vulnerable)
  - Others (specify).....
- v) Infrastructure enjoyed by the household or entrepreneur at present moment.....
- vi) Infrastructure facilities expected at the relocation site.....

### **(Commercial Structure is getting displaced)**

- i) How far do you prefer to be relocated? 1- Within the village or town; 2- Outside the village/town
- ii) If outside the village/town, kindly give the name of the other place.....
- iii) How far is this place from the present location?.....
- iv) What is your preferred rehabilitation measure? (only one choice):
  - Replacement value & Rehabilitation grant
  - Plot on cost basis, Replacement value and Rehabilitation grant
  - Free plot and construction allowance (vulnerable)
  - Others (specify).....

## **TENANT**

### **(Residence getting affected)**

- i) What do you prefer for rehabilitation?.....
  - Shifting allowance and rental allowance
  - Self relocation
  - Others (specify)

### **(Commercial structure getting affected)**

- i) What do you prefer for rehabilitation?.....
  - Shifting allowance and rental allowance and training
  - Others (specify)

*ANNEXURE III: Minutes of Meeting with Jesse Traditional Leadership*

**MINUTES OF MEETING WITH JESSE TRADITIONAL RULER AND ADMINISTRATIVE LEADERSHIP**

<b>1. Project:</b>	Delta NEWMAP: RAP
<b>2. Community:</b>	Jesse-Town, Ethiope West L.G.A.
<b>3. Date:</b>	28 January, 2018
<b>4. Language of Communication:</b>	Urhobo and English
<b>5. Introductions and Protocols:</b>	The meeting started at about 1:45 pm in the palace of the traditional ruler HRM. Otadaferua Edward (JP) Erhiekevwe 1, Ovie of Idgere Kingdom. HRM welcomed the visiting consultant team and all present with traditional kola-nuts ceremonies.
<b>6. Remarks by the SPMU:</b>	Mr. Lucky Oyibo – the State NEWMAP Communication Officer (CO), spoke on behalf of the SPMU. He introduced and presented the Principal Consultant, Dr. Odili Ojukwu to the leaders informing them that the Principal Consultant would brief them on the reasons for the meeting. Also present at the meeting was the SPMU Social and Livelihood Officer (SLO), Mrs. Theodora Oyibo and the Environmental Safeguard Officer (ESO), Mr. Anaro Benedict.
<b>7. Remarks of Principal Consultant, Dr. Odili Ojukwu:</b>	<p>Dr. Odili Ojukwu, the Principal Consultant introduced the members of the consultant team and thanked HRM for his words of welcome.</p> <ul style="list-style-type: none"> <li>• He explained that the purpose of the meeting was to pay homage to HRM and inform him formally of the commencement of a Resettlement Action Plan (RAP) study for his community under the Delta State NEWMAP with the assistance of FGN and World Bank.</li> <li>• He informed the attendees that it was the challenges posed by the perennial Jesse Flooding, with its consequent displacements of homesteads, businesses, farmlands and other assets that precipitated the meeting</li> <li>• Specifically, the study will identify and document those whose assets and means of livelihood would be impacted by the proposed works. Also, an appropriate capacity building programme would be recommended to enable the beneficiaries use the project in a responsible and sustainable manner.</li> <li>• The consultant team would meet with the larger segment of the benefiting community and settlements to sensitize them on the study and solicit their supports and input. The process would include administering a socio-economic questionnaire to the attendees. After which, Focal group discussions would also be held for the men, women and youth. He requested a time be fixed for the meeting with the larger community within the coming week. Saturday, February 3, 2018 was fixed for the larger community meeting.</li> <li>• Dr. Ojukwu also indicated that his team would be in the community for 7 days to document all those who would potentially be affected. He advised that those who would be coming to fill out the forms should come with a passport photograph of themselves and a photocopy of any form of government accepted identification.</li> <li>• The community was enjoined to take ownership of the project by proactive involvement and by instituting community-based monitoring and evaluation activities throughout the course of project</li> </ul>

	<p>implementation. The project subsequently will be maintained by the community when completed making it necessary for the members to know and understand their roles in the project.</p> <ul style="list-style-type: none"> <li>• He solicited the blessing and support of HRM and his community towards the success of the study pleading that the work is a time based task and as such they should accommodate him whenever he calls for meetings for the betterment of the community.</li> </ul>
<b>8. Remarks of HRM:</b>	<p>HRM once again welcomed the Consultants and expressed his delight and joy that the project was progressing, starting with the study. He expressed his goal to see development and progress for his Kingdom but with the flooding and erosion challenges have become a perennial impediment. He promised the full support, safety and cooperation of his people to the Consultant and offered his royal blessings for the success of the exercise.</p> <p>He asked the Site Committee Chairman and the Community Association Chairman to work together with the Consultant.</p>
<b>9. Response of the Consultants</b>	<p>The Principal Consultant thanked HRM and his community for the warm reception and strongly encouraged them to always raise any issue or concern they may have particularly during the larger community meeting. He gave them assurances that he would do his best for the community.</p>
<b>10. Closing:</b>	<p>The meeting closed at about 3:50pm. It was attended by 89 persons.</p>

## MINUTES OF MEETING WITH JESSE MEN FOCAL GROUP DISCUSSIONS

ITEMS	DESCRIPTION
1. Project:	Delta State NEWMAP RAP
2. Name of Community:	Jesse
3. Date:	March 22, 2018
4. Language of Communication:	English and Urhobo
5. Protocols and Introductions:	<ul style="list-style-type: none"> <li>• The FGD meeting with Jesse Elders started at about 12 noon. at Jesse Town Hall.</li> <li>• Thereafter a brief introduction of the consultants and some of the community leaders were done.</li> </ul>
6. Remarks of the Consultant:	<ul style="list-style-type: none"> <li>• The Consultant Mr. lucky Atikpanoro explained the NEWMAP project in Jesse to the men. He told them the project was erosion control in the community. That there was going to be construction of standard drainages across the community that will channel the flood water to the river. He told them that construction of the drainages may affect some structures such as houses, shops, etc. Some foot paths may also be affected. People would experience some inconveniences during the period but it would be temporary.</li> <li>• The men were informed that the construction work was soon to commence and when completed the project would bring happiness and hope for the community</li> <li>• The men were told that the construction work when started would provide some job opportunities for their youths in the community. Market opportunities would also be available for their women in area of small scale catering and petty trading</li> <li>• The construction work may attract people from outside the community and this will increase social interactions with all the attendant good and evil.</li> <li>• The men should understand that the job is theirs. The infrastructure that shall be put in place is their property.</li> <li>• As the construction work commences, the contractor shall come in with different equipment. The men of the community would determine a suitable place where the equipment would be kept.</li> <li>• It would be the duty of the men to use the youths to secure the equipment from theft and vandalization. No man should feel that the security of equipment and tools brought in by the contractor are not their responsibility.</li> <li>• The elderly men should take the responsibility of resolving any conflict that may arise from the execution of the project. They should not allow conflict to affect the smooth execution of the project because that will be to the detriment of the community.</li> </ul>
7. Questions/Concerns of the Community:	<ul style="list-style-type: none"> <li>• You said that some of our structure may be destroyed, will it be for free?</li> <li>• Among the men who are still strong, can they be</li> </ul>

	<p>employed in this work during the construction?</p> <ul style="list-style-type: none"> <li>• Will the payment for affected properties be determined by age, size or condition of the properties?</li> <li>• Now that construction is about to commence, strangers are expected to come into the community with likely social and health challenges such as STDs etc. what measure has NEWMAP put in place to avert such hazard. Will NEWMAP supply such things like condom, mosquito net, etc?</li> <li>• Will another set of people come for registration and verification of affected properties?</li> <li>• What is the duration of the construction project?</li> <li>• The project has long been delayed. When will it commence?</li> <li>• When and how will the money (compensation) be paid to the affected people?</li> <li>• If somebody is a tenant having store in a compound. If the store is destroyed, who shall be compensated, the landlord or the tenant?.</li> </ul>
<p>8. Responses to the Questions and Concern:</p>	<p>In response to the remarks above, the attendees asked the following questions:</p> <ul style="list-style-type: none"> <li>• Well, it is not going to be for free. All structures that would be affected have been verified to be able to determine appropriate compensation.</li> <li>• Yes, any able bodied person who is ready to work shall be employed to work if there is vacancy.</li> <li>• There are laid down criteria to determine appropriate compensation to be paid for every affected structure. So, the determination of appropriate compensation for structure is a job for professional valuer</li> <li>• In the first place, we did not tell you that strangers coming are HIV/AIDS positive. But what we are telling you is that HIV/AIDS does not show on the face and so everybody has to be aware of it. Everybody has to be conscious because prevention is better than cure.</li> <li>• That exercise has been done. I cannot tell you now that other people are coming for that purpose. However, if there is any issue with registration of properties, it should be referred to the verification committee set up by the community.</li> <li>• The duration is subject to what is needed to be done. We do not have information about duration of the project. However, everybody should be ready to cooperate with relevant stake holders to ensure that the project is completed on schedule.</li> <li>• The project has already commenced with all these exercises you have been taking part in. There is no project</li> </ul>

	<p>of this nature that can be executed without adequate plan or preparation. Different consultants have been coming at regular intervals to discuss with the people of the community. Maybe what you want to see as commencement of the project is contractors coming with caterpillars and other heavy equipment. But without what we are doing now, caterpillars cannot work effectively. So the project has actually commenced.</p> <ul style="list-style-type: none"> <li>• As agents of the consultants, we do not know if money is going to be paid to anybody. However, we do know that construction work is going to take place to control erosion in Jesse community. And this will bring great relief to the people.</li> <li>• Compensation will be made to the landlord for land and structure verified and to tenant to his/her store verified. So both landlord and tenant may receive compensation based on verification of claims.</li> </ul>
9. Community Perceptions about the Project:	<ul style="list-style-type: none"> <li>• The project intervention is a welcome development. Speaking on behalf of the Men, the Chairman Site Committee Mr. Lucky Agomate, thanked the consultants for their remarks and explanations and promised that issues of PAPs will not derail or slow down implementation activities.</li> </ul>
10. Vote of Thanks/Closing:	<ul style="list-style-type: none"> <li>• A formal vote of thanks was moved by Mr. Lucky Agomate. The meeting closed with prayers at about 2 pm.</li> </ul>
11. Attendees:	<ul style="list-style-type: none"> <li>• The meeting was attended by 41 Men.</li> </ul>

## MINUTES OF MEETING WITH JESSE WOMEN FOCAL GROUP DISCUSSIONS

ITEMS	DESCRIPTION
1. Project:	Delta State NEWMAP RAP
2. Name of Community:	Jesse
3. Date:	March 22, 2018
4. Language of Communication:	English and Urhobo
5. Protocols and Introductions:	<ul style="list-style-type: none"> <li>• The FGD meeting with Jesse women started with short prayer said by Mrs. Florence Okorodudu at about 10.05am at Jesse Town Hall.</li> <li>• Thereafter a brief introduction of the consultants and some of the community leaders were done.</li> </ul>
6. Remarks of the Consultant:	<ul style="list-style-type: none"> <li>• The Consultant representative, Mr. Lucky Atikpanoro explained the scope of the NEWMAP project in Jesse to the women. He told the women that the project will address the flood and erosion problems in the community. The project involves the construction of standard drainage channels across the community to carry the flood water to the river. Mr. Atikpanoro further informed the women that construction of the drainage channels may affect some structures, such as houses, shops, etc and some land areas may also be acquired for purposes of the construction works. Some foot paths may also be affected. People would experience some inconveniences during the period but it would be temporary.</li> <li>• Mr. Atikpanoro indicated that during the construction work, some skilled and unskilled persons may be needed by the Contractor. There would therefore be opportunities for Jesse people to be engaged directly in the project as well as indirectly into the business of selling food, drinks, water etc. thereby improving their economic status during the period.</li> <li>• This project shall attract people from other places to this community. So there would be social interactions among the workers and members of the community</li> <li>• Some of the interactions between male and female may become intimate. resulting in marriages which is good if properly done. On the other hand, some of the intimacy may result in some social vices such as unwanted pregnancy, STDs, etc.</li> <li>• The Consultant discussed the reality of HIV/AIDS and told the women that the disease does not show on any one's face. Although many people may still nurse doubts about the prevalence of the diseases, it is real and it is ravaging the society. It is therefore absolutely necessary and wise, that parents are expected to give appropriate sex education to their children.</li> </ul>
7. Questions/Concerns of the	<ul style="list-style-type: none"> <li>• NEWMAP has told us that its objective was to construct</li> </ul>

Community:	<p>drainage channels in Jesse to control flood and erosion, can we discuss the payment for our buildings that would be affected today?</p> <ul style="list-style-type: none"> <li>• Since the contractor will engage workers, will our youths also participate in the project?</li> <li>• Many people have written their names several times before now. Is it people that have not registered before that are to write their names today?</li> <li>• My voter's card and passport have not been taken before now, what happens if my shop is demolished.</li> </ul>
8. Responses to the Questions and Concern:	<p>In response to the questions and remarks above, the Consultant responded as follows:</p> <ul style="list-style-type: none"> <li>• The purpose of today's meeting is not to discuss payment for affected structures. Any structures that would be affected by the construction work will be identified by the project and any compensation (if any), for affected structures will be discussed with the affected persons at the appropriate time. Several committees have been set up by the community and these committees shall ensure that the appropriate things are done to all.</li> <li>• It is anticipated that the Contractor would engage some of the youths in the community based on their skill sets. However, this would normally be discussed between the community and the contractor at the appropriate time. There is no community in the country where government project is handled solely by members of that community. So, in a project such as this one, staffs from outside the community are always involved.</li> <li>• Today's meeting is a continuation of the community participation and consultation meeting with the Consultant, Dr. Odili Ojukwu. The names you have written (Attendance Sheet) is to show that you took part in today's discussion. It is very important for you to put your name on the attendance sheet.</li> <li>• Verification of affected structures has been done and their owners have submitted their passport photos and identity cards. Those who have not submitted were called on phone to do so today. However, if you have any issue with verification of site and submission of passport, you may meet the site committee if there is any problem.</li> </ul>
9. Community Perceptions about the Project:	<ul style="list-style-type: none"> <li>• Several community members stated that the project intervention was a welcome development. Finally, the Chairman of the Community Association thanked the Consultant on behalf of the community, and promised that issues of PAPs will not derail or slow down implementation activities including civil works.</li> </ul>
10. Vote of Thanks/Closing:	<ul style="list-style-type: none"> <li>• A formal vote of thanks was moved by Mr. Lucky Agomate. The meeting closed with prayers at about 12 noon.</li> </ul>
11. Attendees:	<ul style="list-style-type: none"> <li>• The meeting was attended by 41 women</li> </ul>

## MINUTES OF MEETING WITH JESSE YOUTH FOCAL GROUP DISCUSSIONS

ITEMS	DESCRIPTION
1. Project:	Delta State NEWMAP RAP
2. Name of Community:	Jesse
3. Date:	March 22, 2018
4. Language of Communication:	English and Urhobo
5. Protocols and Introductions:	<ul style="list-style-type: none"> <li>• The FGD meeting with Jesse Youths started at about 2 pm. at Jesse Town Hall.</li> <li>• The Consultant, Dr. Odili Ojukwu was represented by Mr. Lucky Atikpanoro and Ms. Adaeze Oba who formally introduced themselves as well as some of the community leaders present.</li> </ul>
6. Remarks of the Consultant:	<ul style="list-style-type: none"> <li>• Mr. Lucky Atikpanoro explained that the NEWMAP project in Jesse is aimed at controlling the perennial flood within the region. That there was going to be construction of standard drainages across the community that will channel the flood water to the river. He told them that construction of the drainages may affect some structures such as houses, shops, etc. Some foot paths may also be affected. People would experience some inconveniences during the period but it would be temporary.</li> <li>• The youths were told that now that the project was about to begin, they should be ready to play their role in the community. They should understand that they are the strength and future leaders of the community</li> <li>• The youth were told that the NEWMAP project involves construction of drainages across the community to channel the flood water down the river.</li> <li>• The construction work would affect some structure as they have heard and the project would determine compensation (if any) to be paid to affected persons before commencement of work.</li> <li>• During the construction, the youths may make new friends that may become source of upliftment in their lives.</li> <li>• The project may provide job opportunities for some of the youths during the period. Those of you that are welders, carpenters, brick – layers shall be useful in the construction The Youth should understand that the work is theirs and so emphasis should not be on money benefit but rather on community service.</li> <li>• The Youth should bear in mind that security of equipment and men rest on them during the construction work. They should carry out responsibilities as assigned to them by the elders.</li> </ul>
7. Questions/Concerns of the Community:	<p>In response to the remarks above, the attendees asked the following questions:</p> <ul style="list-style-type: none"> <li>• There are many drainage systems already in place; some are done by state government and others by Local Government</li> </ul>

	<p>Authority. What measures are put in place for the maintenance of these drainages after construction, this one being a bigger project.</p> <ul style="list-style-type: none"> <li>• Before now, I have been interviewed by NEWMAP People but did not submit my passport. My shop (Caravan) was assessed and asked to submit passport subsequently. I was told that I shall be called on phone for it. But after three meetings with NEWMAP and even now, my passport has not been collected.</li> <li>• The project has long been delayed. When will it commence?</li> <li>• My shop was not captured and registered?</li> </ul>
<p>8. Responses to the Questions and Concern:</p>	<ul style="list-style-type: none"> <li>• Every tier of government whether Federal, State or Local government has its own responsibility. This type of project is owned by the community. Therefore, the maintenance is the responsibility of the community in collaboration with the Local government authority. It was stressed that it is the community that suffers the effect of the flood now, therefore having put this facility in place the community should endeavor to maintain it, otherwise the people will suffer effect of another flood.</li> <li>• Site verification has been carried out and Passports/ID Cards submitted. However, if there are any outstanding issues with that exercise, please meet the site committee chairman and we are sure he will listen to you</li> <li>• The project has already commenced with all these exercises you have been taking part in. There is no project of this nature that can be executed without adequate plan or preparation. Different consultants have been coming at regular intervals to discuss with the people of the community. Maybe what you want to see as commencement of the project is contractors coming with caterpillars and other heavy equipment. But without what we are doing now, caterpillars cannot work effectively. So the project has actually commenced.</li> <li>• All issues relating to site verification should be forwarded to the site committee.</li> </ul>
<p>9. Community Perceptions about the Project:</p>	<ul style="list-style-type: none"> <li>• The project intervention is a welcome development. Speaking on behalf of the Men, the Chairman Site Committee Mr. Lucky Agomate, thanked the consultants for their remarks and explanations and promised that issues of PAPs will not derail or slow down implementation activities.</li> </ul>
<p>10. Vote of Thanks/Closing:</p>	<ul style="list-style-type: none"> <li>• A formal vote of thanks was moved by Mr. Lucky Agomate. The meeting closed with prayers at about 3;15 pm.</li> </ul>
<p>11. Attendees:</p>	<ul style="list-style-type: none"> <li>• The meeting was attended by 19 Youths.</li> </ul>

**ANNEXURE VIII: PAPs Who Have Not Provided Photo Identification**

All PAPs identified in this matrix failed to provide photo identifications as required and would not respond to all efforts made by the Consultant and the community leaders to obtain the necessary photo identifications. Compensation to these persons should be paid only upon presentation of their respective photo identification and/or letters of attestation from the traditional ruler.
